Sixty-second Annual Report

of the

City of Burlington

Vermont

For the Year Ended December 31

1926

POPULATION: Census 1920, 22,779

FREE PRESS PRINTING CO., BURLINGTON, VT.

RESOLUTION

Resolution relating to the publication of the Sixty-second Annual City Report, adopted at a meeting of the Board of Aldermen, held on the 3rd day of January, 1927.

CITY OF BURLINGTON

In the year one thousand nine hundred and twenty-seven.

Resolved, By the Board of Aldermen of the City of Burlington, as follows:

That the City Clerk is hereby directed to prepare for publication the Annual Reports of the City Officers for the year 1926 and such other matter as is usually published in the City Reports, and under the direction of the Mayor, to procure printed Sixteen Hundred (1,600) copies thereof, for taxpayers and general distribution, and that said copies be printed and ready for distribution at least two weeks before the Annual City Election. That bids for the printing and binding of above said report be asked for by the Board of Finance.

Approved January 12, 1927.

CLARENCE H. BEECHER, M. D., Mayor.

CITY GOVERNMENT

OF THE

CITY OF BURLINGTON

1926

MAYOR

HON. CLARENCE H. BEECHER, M. D. — City Hall

TERMS OF OFFICE

The term of office of the Mayor and Aldermen commences the first Monday in April; of the School Commissioners, the first day of July.

Street, Water, Cemetery, Police, Fire and Light Commissioners—One appointed in April each year for a term of three years, from April 25th next following his election, and until his successor is appointed and qualified.

City Assessors—One appointed in March each year, for a term of three years, from April 1st, following his election, and until his successor is appointed and qualified.

Park Commissioners—One appointed in April each year for a term of five years.

Board of Charities—One appointed in April each year, for a term of three years; from the 25th day of the same April and until his successor is appointed and qualified. Overseer of the Poor, appointed between April 25th and May 1st, with the approval of the Board of Aldermen, to serve one year from May 1st following his appointment and until his successor is appointed and qualified.

Board of Health—One appointed in April each year, to serve three years. Health Officer appointed by the State Board of Health. Inspector of Milk and Food and Inspector of Plumbing appointed by the Board of Health.

Board of Library Commissioners—One appointed by the Trustees of the F. F. Library and one by the City Council, to serve two years.

Building Inspector and Deputy—Appointed in March to serve two years.

All other officers one year, from April 25th, except the Superintendent of Water Works, the Superintendent of Streets and the Superintendent of the Electric Light Plant, who are annually appointed between April 25th and May 1st to serve one year from the 1st day of May, following his appointment or until his successor is appointed and qualified.

MAYOR'S MESSAGE

To the Honorable Board of Aldermen of the City of Burlington:

GENTLEMEN:—In spite of the unusual expenditure of time which has been made necessary in the discharge of the Mayor's duties during the past year, I still believe that the most important duty of the office is to see "that the duties of the subordinate officers are faithfully performed"; and this in spite of the finest spirit of cooperation from the personnel of all departments. This spirit of cooperation is especially evident when I note that practically all the recommendations made in my message to you a year ago and many other suggestions since have become accomplished facts, and other projects are well under way.

The building program which was made possible by the bond issues will be speedily and economically prosecuted to completion. The funds available must be sufficient for the purpose and I believe they are. The bond issues of recent years make it even more important that we see that the funds of the City are properly expended—in spite of the fact that we are well within our legal limit of bonding. We must see to it that for all our expenditures we get adequate returns and that we promptly meet our obligations.

This is the last year of the five-year bond issue for permanent road construction. We should continue each year to hard surface more of our streets. While we will, as in the past, be able to do some permanent work each year from the ordinary tax receipts for highways, that will be insufficient and provision should be made for additional funds. This may be done either by further bonding or for a time by a special tax each year in addition to the usual twenty cents on the dollar of the grand list for highway purposes. A ten or fifteen cent tax each year for this purpose would be sufficient, since it would raise from $25,000 to $40,000.

The inventory of the city property which was made during the last year has revealed the fact that the insurance on our property needs adjusting. I recommend that you secure the services of insurance experts to give you advice on this matter, that we may be ade-

quately protected against loss, at a fair rate and with a uniform yearly distribution of the premiums. It may appear that the cost of all insurance should be paid from a special fund and so relieve the various departments of unusual burdens from this item.

The City Representative to the next Legislature should be instructed by you not only in regard to many needed charter revisions, but also with reference to other matters which materially affect our welfare. One of these is the tax (registration fee) imposed on the thousands of automobiles owned by our city taxpayers, which tax now goes into the general fund of the State. This is the only tax paid on this property, many of these automobiles never go outside the city limits, and from practically all of them the proportionate wear on our streets is much more than on the roads elsewhere in the State. If a tax were being paid on this property as is now paid on other city property, it would amount to approximately $100,000, which we now lose. We, in common with all towns, should have a certain percentage of this registration fee returned to us for our own roads, especially so long as the State fails to use it entirely for road work and shows practically no concern about our streets. This is a direct State tax in which the towns are the heavy losers.

I feel that we should lend what assistance we may to those who are concerned in having that part of South Burlington on the east side of Shelburne Road, which naturally is a part of our community and which we now supply with some city advantages, legally included within the city limits. This could well be called to the Representative's attention.

I suggest that requests for the services of the Wire Inspector made by city departments be in triplicate, one to be retained by the department making the request, one sent the Inspector and the third sent to this office. In addition, the Wire Inspector should be required along with all other Inspectors to present a written report in person at each regularly monthly board meeting.

There will be other recommendations from time to time, but these serve for present discussion.

I know this will be a busy year for those in charge of the City's affairs, necessitating much thought and work on the part of all of us. I hope we may so correlate the work that we have a minimum of meetings so as to interfere as little as possible with your other activities.

I appreciate fully that what progress has been made in the past year is to your credit and to the credit of all those who have had a part in furthering it. I trust we may continue the cooperation which has been so prominent a feature in the work of this past year.

C. H. BEECHER,
Mayor.

April 5, 1926.

REPORT OF THE BOARD OF LIBRARY COMMISSIONERS

OF THE

FLETCHER FREE LIBRARY

To the Honorable City Council of Burlington, Vt.:

The Board of Library Commissioners of the Fletcher Free Library respectfully submits the following report for the year ending December 31, 1926:

FINANCIAL STATEMENT

RECEIPTS

Appropriation	$8,400 00	
Interest	555 63	
		$8,955 63

DISBURSEMENTS

Salaries	$6,581 24	
Lighting	109 47	
Telephone	45 67	
Fuel	962 75	
Postage	22 00	
Insurance	173 40	
Water tax	12 74	
Laundry	10 60	
Binding	1 87	
Repairs on building and renewal of equipment	763 14	
Supplies	116 92	
Unexpended balance	155 83	
		$8,955 63

For statistics of the Library service and for an account of the activities of the year we would refer you to the Librarian's report.

In last year's report attention was called to the overcrowded condition of the stack, and a request was made for an appropriation sufficient to install another tier of steel shelving in the stack room as provided for when the building was erected. As no funds were made available for that purpose we are obliged to ask that the City Council give the matter consideration at an early date.

It was necessary to make extensive repairs on the roof this year, and much needed additions to the equipment of the Library were made by the purchase of a mineograph and a new catalog case.

The linoleum on the Library floors is—much of it—worn out beyond repair and needs to be replaced by a new covering as soon as funds are available.

Respectfully submitted,

HENRY L. WARD,
LYMAN C. HUNT,
EDMUND C. MOWER,
DANIEL A. LOOMIS,
Library Commissioners.

REPORT OF THE TRUSTEES

OF THE

FLETCHER FREE LIBRARY

To the Honorable City Council of the City of Burlington:

Again it is my privilege and pleasure to present to you on behalf of the Library Trustees the annual report of work done by the Fletcher Free Library during the year ending December 31, 1926.

It is satisfying to have our work sustained from year to year. The giving out of nearly 106,000 books for use in all sorts and conditions of homes must necessarily improve the intellectual and moral status of the City, but we cannot expect that measure of growth in circulation which would come with the opening of branches, or even deposit stations in parts of the City far distant from the present Library building.

Our service could be greatly increased if it were possible to secure a larger endowment, and on this phase of library necessities I quote word for word from an address to the American people entitled "Remember the Library":

"The American Library Association invites the American people to a consideration of the service which libraries are now rendering, and to the possibilities of greater service as larger financial means become available for their work. Through national, state, county, municipal and endowed public libraries, continuous education may be provided for all ages and classes of people at a very small expense as compared with that of their formal education. No less important in the economy of daily life is the recreational service of libraries.

"The American Library Association believes and declares that the community served is primarily and directly responsible for the financial support of the library, as it is for the support of its schools. We believe, nevertheless, that through the provision of endowment or trust funds, supplementing those received from taxation, the work of libraries may be greatly extended, enriched and improved."

The work with children is of incalculable value. Between two and three thousand books—all judiciously selected—are sent out every year for use in the schoolrooms or to be issued for home use. Thirty-

three schoolrooms were favored with this privilege this year. For a detailed and interesting account of the year's work I take pleasure in referring you to the Librarian's report.

Few people not intimately acquainted with the administration of a library in a City like ours realize how varied and extensive is its service to the community, nor do they stop to think how much the popularity and continued prosperity of our Library is due to the quality of the service rendered by the Librarian, Mr. George Dana Smith, and his efficient staff. This service deserves our highest commendation, warmest appreciation and most sincere thanks.

Respectfully submitted,

MARGARET CHESTNUT BUELL,
Secretary.

REPORT OF THE LIBRARIAN

OF THE

FLETCHER FREE LIBRARY

The annual report of the Librarian for the year ending December 31, 1926, the fifty-third since the opening of the Library and the nineteenth given by the present Librarian is respectfully submitted.

In presenting this report there are no striking changes in administration to record. The library service has been continued in accordance with such methods as have seemed consistent with our aim to make the Library a municipal asset of permanent value to all residents of the City.

Number of days open	303½
Number of books issued for outside use	105,697
Number of pictures issued for outside use	574
Largest daily issue, February 27	684
Smallest daily issue, July 22	132
Average daily issue	348
Percentage of non-fiction circulated	38⅕
Percentage of fiction circulated	61⅘
Books issued per capita	4⅕

The circulation by classes compared with that of 1925 is given in a supplementary table at the end of the report. Those statistics show a small decrease in the circulation of fiction and of books issued from the schoolrooms, while in some classes of non-fiction there was a slight gain in circulation, but not enough to offset the loss in fiction. The total number of books issued for home use, 105,697, was 948 less than issued in 1925. The smaller circulation of fiction from the Library probably does not indicate a greater interest in serious reading, but may be attributed to an increasing patronage of the several rental libraries in the City which supply more copies of fiction than our Library thinks advisable to purchase.

ADDITIONS AND CATALOGING

Received by purchase	807 vols.
Received by gift	395 vols.
Transferred from the pay duplicate collection	149 vols.
Total additions	1,351 vols.
Withdrawn	483 vols.
Net increase for the year	868 vols.
Number now cataloged	49,387 vols.
Repaired in the Library	6,665 vols.
New titles cataloged, 1926	857
Number of cards in catalog	99,481
Number of periodicals received	115 titles

All the accessions for the year have been cataloged. The new titles added were classified as follows:

Reference and General Works	41
Philosophy	21
Religion	27
Sociology	36
Education	10
Language	3
Science	30
Useful arts	42
Fine arts	15
Music	19
Recreation	16
General literature	74
Poetry and drama	60
Travel	45
History	55
Biography	57
Fiction	140
Books in foreign languages	19
Juvenile books	147
	857

It is claimed that the output of books in the publishing world in 1926 was the largest in history, and that the average quality of the

publications was the highest in many years. In our purchases, the aim has been to add as many books that have promised to be of general interest as our income would permit. A long list of such purchases might be given, but the following titles will show the wide range of subjects included in our additions: "Why We Behave Like Human Beings" by G. A. Dorsey was probably called for more often during the year than any other of the newer books. Two books by Bruce Barton, one, "The Man Nobody Knows," a discovery of Jesus by a business man, and the other, "The Book Nobody Knows," a terse commentary on the Bible, have had many readers. Almost as much in demand have been "Abraham Lincoln, the Prairie Years" by Carl Sandburg; "Our Times: The Turn of the Century" by Mark Sullivan; "The Intimate Papers of Colonel Edward M. House"; "The Travel Diary of a Philosopher" by Count Hermann Keyserling; "The Story of Philosophy" by Will Durant; "On the Trail of Ancient Man" by Roy Chapman Andrews; "The Arcturus Adventure" by William Beebe; and "The First World Flight" by Lowell Thomas.

The year has been a notable one in its production of works of fiction by novelists of established reputations, both English and American. One hundred and forty new titles have been added to our collection, with duplicate copies of the more popular ones. Several of the new novels have been in great demand for a short period, but few of them have achieved lasting popularity. Probably the novel most called for was the "Private Life of Helen of Troy" by John Erskine; "The Silver Spoon" by John Galsworthy adds another volume to this author's "Forsyte Saga." "The Show Boat" by Edna Ferber, a story of theatrical life on a Mississippi boat a generation or more ago, is of unusual interest. In "Harmer John," an unworldly story, Hugh Walpole gives another glimpse of life in the little English town of Polchester. Several novels by new and younger writers of much promise have appeared this year, one of the most significant being "The Hounds of Spring," a story of pre-war, war-time and post-war England, by Sylvia Thompson, a young English writer. These few titles have been selected from the long list of novels as representative of the class of fiction that the Library endeavors to supply to its readers.

As stated in previous reports, we suffer the loss of a considerable number of books because of irresponsible borrowers. A conservative

estimate of such losses this year mounts up to 77 volumes. Some of our patrons have been unusually remiss this year in returning books on time. It is doubted if in any year in the history of the Library it has been necessary to send out as many overdue notices as in 1926.

REFERENCE ROOM

All questions of the day that prove to be of general interest to the public are soon reflected in the demands at the Library desk. In order to meet this demand the reference room is supplied regularly with 115 periodicals in addition to the year books and other up-to-date reference material obtained from many sources. The more important additions to the reference collection this year were: Webster's New International Dictionary, 1926 edition; New York Times Index, published quarterly; Putnam's Complete Book of Quotations, and a duplicate copy of "Vermont, the Green Mountain State," in four volumes, by W. H. Crockett.

The series of little books called "Reading with a Purpose" sponsored and published by the American Library Association, has proved to be suggestive and helpful in answering requests for lists of books for clubs and others interested in a course of systematic reading. There are now 22 courses in the series with an additional course to be published every month.

CHILDREN'S ROOM AND WORK WITH SCHOOLS

Circulation of fiction from children's room	14,427
Circulation of non-fiction from children's room	10,436
Total circulation	24,863
Number of new books for children's room	243
Number of schoolrooms supplied with books	33
Number of books issued for schoolrooms	2,332
Number of stereographs and pictures issued for schoolrooms	574
Number of books issued from schoolrooms for home use	9,094

There has been a gain of 3,915 in the circulation of children's books. Two hundred and forty-three new books were added to the collection, 147 being new titles. Many of the best examples of juvenile literature are given out daily to our young readers. Every afternoon

when school is done the children's room is suddenly filled with a clamorous crowd of youngsters eagerly searching for some book on the required reading list furnished by the English teachers in the public schools.

The Vermont Interscholastic Debating League has for its question this year "Resolved: That Congress should enact legislation embodying the principles of the Haugen Farm Relief Bill." The Library supplies reference material not only for the debating team of the local high school, but for the teams from out-of-town schools that can come to the Library to make use of it.

The books used by the class in community civics from the high school numbering about 150 students are now in such a worn-out, or dilapidated condition that several replacements will be necessary if the school relies upon the Library again to supply reference books for the course. It will not be an easy matter to replace some of the books, as they have been long out of print and can only be obtained through second-hand dealers at a high price.

MISCELLANEOUS

One of a librarian's pleasures is in the receiving of donations of books from interested and appreciative friends of the Library. We have been exceptionally favored this year by welcome gifts of new books and others that had been read and were of no further use upon the owner's shelves. Many of the gifts have been of great use in the Library for the replacement of old and worn-out copies of works always in demand. All donors are made aware of our gratitude at the time gifts are received as the publishing of the list of givers would be too long for a place in this report.

Mrs. H. C. Tinkham presented the children's room several mounted specimens of birds and a deer's head, all of which are of interest to the children, especially the younger frequenters of the room.

I desire also to make grateful acknowledgment of the many favors received from the local newspapers.

The Librarian and two members of the staff, Miss Lee and Mr. Berger, attended the annual meeting of the Vermont Library Association at Barre in June. The Librarian at that meeting gave a paper entitled "The Library a Continuation School; or, Reading with a Purpose." The Librarian also attended the fiftieth anniversary Con-

ference of the American Library Association held at Atlantic City and Philadelphia in October.

Only one change has occurred in the staff. Miss Elizabeth Rogers, after twelve years of faithful service, gave up her position on November 1 because of failing health. Mr. A. A. Berger, who has served as a substitute for a year and a half, has now become a regular member of the staff.

I am again grateful to the Board of Trustees and the Board of Library Commissioners for their advice and support, and I appreciate deeply the loyalty of the Library staff and their unfailing good-will.

Respectfully submitted,

GEORGE DANA SMITH,
Librarian.

SCHOOL CENSUS REPORT

TABULATED SUMMARY OF SCHOOL CENSUS

SECTION 1248—GENERAL LAWS

Burlington, Vt., August, 1926.

The following statistics derived from the census of children of school age, resident in this town, enumeration of which was made in August, 1926, are hereby submitted.

BETWEEN "6 AND 8 YEARS," MEANS FROM SIXTH TO EIGHTH ANNIVERSARY OF BIRTH

1. Number of children between 6 and 8 years.....1,233
2. Number of children between 8 and 16 years.....3,113
3. Number of children between 16 and 18 years..... 720
4. Number of children between 6 and 18 years (sum of preceding items) 5,066
5. Number of boys between 6 and 18 years.....2,524
6. Number of girls between 6 and 18 years.....2,542

Respectfully yours,

Signed: J. A. RUST,

Clerk of School Board.

TRUANT OFFICER'S REPORT

To the Board of School Commissioners and L. C. Hunt, Superintendent of Schools:

GENTLEMEN:—I respectfully submit my report for the year ended June 30, 1926.

During the year as often as it was possible for me to do so I have investigated all cases reported to me, and reported my findings

to the principals of the different schools. I have also investigated the conditions at homes of poor families who were in distress and helped to better the conditions of those who were in need, with the kind assistance of our charitable organizations of this City. You will notice a great reduction in the number of truancy cases owing to the untiring efforts of principals, teachers and all other officials whose duties are for the welfare of our schools and children, in explaining to the parents the great necessity of giving their children an education and keeping them in school.

I wish to thank all those who so willingly helped in this good work.

Respectfully yours,

Signed: H. J. BRAY,

Truant Officer.

REPORT OF THE

SUPERINTENDENT OF SCHOOLS

January 1, 1926, to December 31, 1926

In compliance with Section 162 of the city charter, the fifty-ninth annual report of the Department of Public Schools and my fifth as Superintendent are respectfully submitted.

The outstanding achievement of the year in this department was the completion and occupancy of the Junior High School building and gymnasium.

The first recommendation proposing a Junior High School building in Burlington appeared in the annual report of the Superintendent of Schools in 1915. Again in 1917 the Superintendent made a definite recommendation regarding the location and size of the building. Because of the war and high cost of construction following that period, action was delayed until December 1, 1920, when the old Junior High School building, corner of College and Willard Streets, and the Junior High Annex, corner of Main and S. Union Streets, were condemned by the City and State Boards of Health. Even then temporary repairs were made and permission was gained to use these buildings for one year providing plans were immediately started for new buildings. August 31, 1922, the State and City Health Boards, acting jointly, definitely forbade further use of the Annex and limited the use of the old Junior High School to the end of the school year in 1924.

Plans and preliminary sketches were presented to the school for the first time June 2, 1922.

At that time the Board of Commissioners was made up of the following members: F. E. Kimball, Ward 1, president; J. P. Murphy, Ward 3, clerk; Mrs. E. F. Moore, Ward 2; J. R. Kelley, Ward 4; J. A. Rust, Ward 5; and H. H. Hagar, Ward 6.

During the next two months drawings and plans were presented for consideration by five different firms of architects and on September 2, 1922, the first petition for an appropriation of $350,000 was sent to the City Council. On October 24, 1924, Frank L. Austin of Bur-

lington was chosen architect, and the School Board made definite decision to locate the building on the Edmunds High School lot just east of the Edmunds building.

The original petition to the City Council, after certain amendments regarding the purchase of an athletic field by the School Commissioners and also the purchase of a strip of land sixty feet wide from the Austin estate just east of the Edmunds property had been rejected, was passed by the Board of Aldermen but failed to receive the Mayor's signature and was lost.

In December, 1923, State Commissioner of Education C. H. Dempsey was asked to make a study of the school situation and present his recommendation regarding the construction of a new building. His recommendation outlined very closely the plan that was finally adopted and on February 1, 1924, the second petition for an appropriation of $350,000 was presented to the City Council. A resolution granting this petition was passed by the City Council, March 3, 1924. However, the Mayor refused to sign the bonds and it was necessary for the School Commissioners to secure a writ of mandamus from the Supreme Court of the State, ordering the Mayor to affix his signature to the bonds. This decision, favorable to the School Commissioners, was received from the Supreme Court February 18, 1925, and the bonds sold March 12, 1925.

Plans and specifications were then completed as rapidly as possible and bids for construction of the building were opened June 16, 1925. The lowest bids exceeded the appropriation of $350,000 and before contracts could be signed it was necessary to request an additional appropriation of $115,000. This extra appropriation was voted by the Aldermen on July 2, 1925, and following contracts signed immediately. Kieslich Construction Company was awarded the contract for general construction at $309,353.67. The contracts for heating and plumbing, amounting to $55,565.42, were awarded the G. S. Blodgett Company, and the Sherwin Electric Company received the contract for electric wiring and fixtures for $17,140.95.

The above contracts include the passageways, the stairways and new balcony and stage in the auditorium of the Edmunds High School.

In the statistical tables just preceding will be found an audited statement of expenditures to date on account of this construction.

Although the original bids were not divided to show the cost of

the Junior High School, the gymnasium and the work in the Edmunds High School as separate units, the architect and contractors have made the following estimate of costs:

Junior High School building	$275,706 72
Gymnasium	107,222 45
Passageways	7,784 78
Edmunds High School:	
Auditorium, stage and balcony	13,742 90
Stairway	7,336 00
[1]Heating plant	19,667 04
Inspector	3,360 00
Grading to date	5,222 90
Equipment:	
Junior High School	19,003 29
[2]Gymnasium	3,307 66
Auditorium	1,564 50
	$463,918 24

During the period of making the plans the following men served on the School Board for part of a regular term in each case: J. M. Beckwith, Ward 2; Dr. C. H. Beecher, Ward 2; Prof. George P. Burns, Ward 6. At the time the contracts were awarded and during the greater part of the period of construction the Board members were: F. E. Kimball, Ward 1, president; J. A. Rust, Ward 5, clerk; T. S. Brown, Ward 2; Edward J. Lavallee, Ward 3; J. R. Kelley (until June, 1926), W. J. Upton, Ward 4; and F. H. Kehoe, Ward 6.

The Junior High School building was occupied for the first time September 27, 1926, although work was not entirely complete at that time. The gymnasium was ready for use January 1, 1927.

The Buildings

The Junior High School building, gymnasium and Edmunds High School form one large group. The new buildings are finished in gray pressed brick, which harmonizes well with the Edmunds High School.

[1]Does not include $8,670.11 apportioned to Edmunds High heating plant and charged against regular appropriation.

[2]Does not include bleachers.

All the buildings are connected by an enclosed passage which permits classes to pass from one building to another without going out of doors.

The Junior High School building with outside dimensions of 97 feet 2 inches by 184 feet 4 inches, has three floors. A fireproof corridor with brown mastic floors runs the entire length of the building and three fireproof stairs well provide safe and ample exits. On the first floor, which is at ground level, there are two classrooms, a lunch

Junior High School and Gymnasium

room which will seat one hundred pupils, a foods laboratory and model suite, and a sewing laboratory, a wood-working shop and drafting room, and a print shop. On the second floor there are ten classrooms, the principal's office, rest room for female teachers and an emergency room. The third floor has nine classrooms, a large study room and library and a room for men teachers.

Each of the classrooms has a capacity of thirty-five or thirty-six pupils (this could be increased to forty without crowding the room).

The standard equipment of the classrooms is a fixed pedestal desk and seat. Wardrobes that are well ventilated and so arranged as to be under the supervision of the teacher are provided in each classroom. All interior finish is in plain oak stained to match the finish in the Edmunds High School building.

The number of home room stations in the classrooms is seven

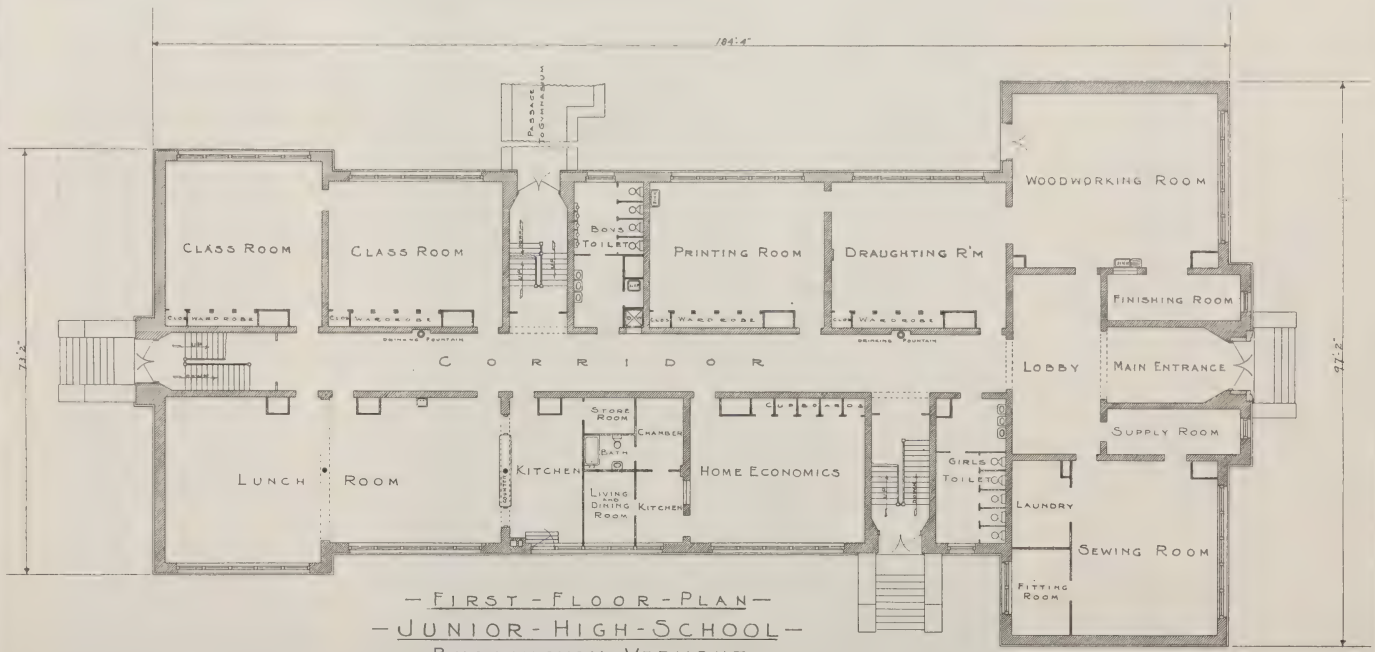

A Typical Class Room

hundred thirty-five, and the total capacity of the building is eight hundred fifty pupils.

The cafeteria or lunch room is equipped to serve hot lunches and about two hundred fifty pupils are now taking advantage of this service. The cooking laboratory is arranged on the unit kitchen plan, with model kitchen and dining room adjacent.

The gymnasium, which has outside dimensions of 64 feet by 116 feet, has a main floor 92 by 60. For class purposes this will be divided by a curtain, thus providing separate floors for girls' and boys' gym-

nasium classes. This division will provide two basketball courts 58 by 35. The large court is 70 by 39 and when used for interscholastic games the gymnasium has a seating capacity of about one thousand. There are large locker rooms with good showers and individual dressing compartments are provided for the girls.

In the Edmunds High School building a fireproof stairway was put in at the east end of the south corridor. In the assembly hall a new balcony seating two hundred ninety-eight persons was constructed and a modern stage 28 by 15 provides good facilities for school dramatics and high school assemblies.

The entire high school, that is, the Junior High School and the Edmunds High School, has a total attendance of one thousand one hundred forty-two pupils. The buildings are ample to care for increase in growth up to a total of one thousand five hundred pupils.

The buildings are modern in every respect, well lighted and properly ventilated, and should meet the demands of the high school needs of Burlington for many years.

Elementary Schools

The eight elementary school buildings of the City are in better repair than they have been for many years. During the last summer modern electric light fixtures were placed in three buildings, Adams, Champlain and Wheeler. Every school building in the City is now properly and sufficiently lighted. Painting of exterior woodwork and refinishing of walls in corridors and classrooms now constitute the most necessary items of repair.

Playgrounds

In June, 1926, the School Board purchased a plot of ground 85 by 200 near the Lawrence Barnes School to be added as a playground for the children at that building. With the addition of this property every school is now equipped with a suitable playground. To make these more satisfactory a small amount of grading should be done on some of them and the playgrounds at Adams and Lawrence Barnes must be fenced during the summer of 1927.

This report has dealt entirely with a description of the school plant and grounds. In the balance of the report school activities and classroom problems will be briefly discussed.

The Teaching Staff

Any marked improvement in the teaching force of our schools must be made in the improvement of the teachers already in service. This is true because of the fact that the number of annual changes in the teaching force is so small that the professional attitude of the teachers already in service dominates the situation.

During the past three years many of our teachers have taken summer school courses and extension courses to meet the requirements for advancement on the salary schedule with the result that we have in most cases a keener spirit of professional inquiry and thoughtfulness in connection with teaching procedure.

While the incentive in some cases has been a desire for promotion on the salary scale, yet there seems to be a growth in this better professional spirit even though many have gained the maximum salary.

The requirement of two years' training and at least one year of experience before election to a position in the elementary grades is resulting in a better professional attitude among the teachers. The Superintendent recommends that preference be given to teachers having three or four years' experience, a part of which has been in a graded school.

Textbooks

For several years the Palmer System of Penmanship has been used in the entire school system.

This system had its fundamental basis on a free-arm movement which was obtained by the use of many exercises, involving the larger muscles of the arm. While good results were obtained by some teachers, in many cases the results failed to carry over into the written work other than that done during penmanship period. In September, 1926, new books and manuals were provided for trial in one of our elementary schools. This system which has been developed by Mr. Harry Houston, Supervisor of Penmanship in New Haven, Conn., emphasizes correct letter formation, and careful supervision and testing of the individual effort of each pupil. Excellent manuals are provided for each teacher.

The results in the school were sufficiently satisfactory to warrant the use of this system and its books in all our elementary schools.

The entire aim is legibility and reasonable fluency. By carefully following the course as outlined in the manuals and careful supervision of the efforts of individual pupils we hope to show marked improvement.

Last September the Knight, Studebaker and Ruch, standard service arithmetics, were introduced in grades three, four, five and six. This series displaced arithmetics that had been used for many years. While they offer no radical change in material offered, a greater variety of problems is presented and each book contains a series of standard tests well graded and so arranged that the progress of the individual can be carefully checked.

School Music

For the first time in its history the high school boasts a band. This organization will make its first public appearance early in January, 1927. At the present time there are twenty-six members and more boys would be glad to join if instruments were available.

The orchestra has increased in size until it has a membership of forty-seven boys and girls. Both organizations are anxious to compete in the New England School Band and Orchestra Festival which is held in Boston in May. Much credit is due Mr. A. E. Holmes, leader of these organizations, for their development and skill.

In making this report I have given a brief history of the different steps in the construction of the Junior High School building and gymnasium and a description of the buildings, as it seemed best to have these facts in one record. Less comment than usual has been made upon the regular activities of the school year, but they have been for the most part successful and the condition of the schools is most encouraging in every respect.

In closing I desire to thank the members of the Board of School Commissioners for their cooperation. And in behalf of all who are in any way connected with this department I wish to express our hearty appreciation of the splendid public support which has encouraged us in our efforts.

Respectfully submitted,

Signed: LYMAN C. HUNT,
Superintendent of Schools.

REPORT OF THE

BOARD OF PARK COMMISSIONERS

Burlington, Vt., January 1, 1927.

To the Honorable, the City Council:

Your Board of Park Commissioners respectfully submits herewith the annual report of the work done by the Park Department during the year 1926.

The past year has been one of unusual activity in our department. The older parks and the many triangles about the City have been maintained in first-class condition. A large amount of new work has been done in improving the less developed areas.

Ethan Allen Park continues to be one of the most attractive places in or around Burlington. It was used by our local citizens, by neighboring towns for picnic grounds and by very many tourists. The chief points of attraction were the Ethan Allen Tower and the pinnacle. An athletic director who had visited over 200 park systems in this country said that the view from the pinnacle was the finest that he had even seen.

The drive to the pinnacle has been widened to 18 feet and next year this much-needed improvement will add to the pleasures of those who use the park.

The Municipal Bathing Beach was well patronized by tourists, visiting communities and the local people. The weather conditions affect the attendance but on warm days the bath houses were taxed to capacity. The family bath house was appreciated by those who rented apartments. The canoe space was rented in part.

The band concerts at the Beach were well attended and attracted many people who do not usually go there.

The Tourists' Lodge and camp grounds were well filled during the months of July and August. The people using these grounds appreciate the accommodations and without exception cooperate to keep them orderly and clean. Some few come back every year and are regular patrons. Many of the campers, especially the women,

when they come in from a hard drive do not feel like going to the lake. For these a warm shower would be most welcome and we believe that one should be installed. This is the only suggestion for improvement that has come from the tourists. In most cases a small fee is charged for the shower. For the season we rented 1,356 spaces. As the average number of persons per car is 4, the total registration was 5,424 persons.

The public bath house was a financial success, although due to inclement weather the profits were smaller than the previous year. The $2,000 realized from this source was used, by your authorization, in grading the athletic field at South Park.

The most extensive improvement of the year was the grading and draining of the athletic field on Pine Street. In this work we had the cooperation of the City Engineer. The rough grading was finished in October and the work left to settle over winter. The grading of the diamond was finished. In early spring the remaining work will be completed and the field should be in playing condition this season.

However, before the project will be complete two things must be done. First, the entire field must be fenced. Without this there is no possible source of revenue either to the City or to the two high schools. Second, it is essential that we have a grandstand of sufficient size to seat any crowd which might go there and which would provide dressing rooms and showers for the players.

The playgrounds were crowded during the summer months. These are officially opened as soon as school closes and are run until Labor Day. They are a source of pleasure to thousands of small children who have a place where play is safe from automobiles under a competent supervisor. The tennis court at Smalley Park was in constant demand by the smaller children. The supervisor, Mrs. G. A. Robbins, trained the children who gave a play at the park. The profits of this entertainment were sufficient to buy tennis net, rackets and balls.

This supervisor was present 127 half-day sessions with a total attendance of 7,290 children. This gave an average at this park of 57 children per session.

With the removal of the older baseball men to South Park it will be possible to develop this park entirely for the use of the younger children and hence increase its usefulness many-fold.

The other playgrounds were equally well attended and were under competent supervisors.

The skating rinks were more than crowded on every good day. So great is the number of skaters of all ages that it is extremely difficult to keep good ice. On a clear, cold day it is not uncommon to have as many as 2,000 persons at Roosevelt Park.

The street trees have received much attention and are in fair condition. There has been no damage to property by falling trees or limbs during the year. The department has devoted its attention to removing dead or dying trees and the cutting of dead branches. On many streets the trees are too thick to grow well and for this reason the number of dead branches is very large.

On the other hand, many trees have been planted during the year. Young elms from our nursery at Ethan Allen Park were planted on the streets from which poplar trees were removed in 1925. We planted more trees than we removed.

With the building operations connected with the new City Hall it is probable that most of the band concerts must be given in Battery Park this season. The bandstand there is entirely too small to accommodate the band and should be enlarged or a new one built. The former would not cost possibly to exceed $250 and would be much appreciated by the band.

It has been some time since we purchased new apparatus for the playgrounds. The slide at Ethan Allen Park is about used up and additional apparatus should be placed at all the playgrounds.

The Board wishes to express its appreciation of the cooperation which it has received from your honorable body during the past. This has added much to the efficiency of work and to the pleasure of our members.

THOS. F. CONLON, Chairman,
HENRY WAY,
J. J. FLYNN,
J. HOLMES JACKSON,
RAYMOND BEAULIEU.

REPORT OF THE

CEMETERY COMMISSIONERS

January 1, 1927.

To the Honorable City Council:

GENTLEMEN:—The Board of Cemetery Commissioners respectfully submit herewith the annual report of the work done by the Cemetery Department during the year 1926.

Minor repairs have been made on the houses at both Green Mount and Lake View Cemeteries. The cemeteries have been kept up in unusually good condition and credit must be given to Superintendent Clayland for their good appearance, especially so, as he is handicapped by lack of funds. We have had forty-two lots endowed this year, which is very good for the Cemetery Department and the lot owners. It is hoped that a like number or more will be endowed this year. We are anxious to get the new section in condition to use and respectfully ask the cooperation of your honorable body in getting funds for us so that we can properly fence this addition and get the roads laid out.

We are at work revising rules of the cemeteries and these will be submitted for your approval in due time.

We are enclosing a report of receipts and expenditures of the city cemeteries.

Respectfully submitted,

W. H. LINSLEY, Chairman,
EVELYN P. DEYETTE,
FRANK J. HENDEE, Sec.,
Board of Cemetery Commissioners.

REPORT OF THE

HEALTH OFFICER

To the Honorable Board of Health Commissioners:

I submit the following detailed report of the Health Officer for the year ending December 31, 1926.

VITAL STATISTICS

During the year 1926, there were 660 birth certificates filed with the City Clerk, which was 69 less than the number for 1925. There were 408 death certificates recorded, which was 26 less than the number for 1925. No deductions have been made for non-residents. Two hundred forty-six marriage certificates were returned for tabulation.

POPULATION

For the purpose of this report, the population of the City is estimated to be 25,000.

BIRTHS

There were 660 births in Burlington during the year, which was 69 less than the number recorded for 1925, and gives a birth rate of 26.4. According to the birth certificates filed, 157 of the babies were born to non-resident mothers in our institutions, which reduces our resident birth to 503, and the resident birth rate to 20.1.

There were 324 females and 336 males born. The youngest mother was fourteen (14) and the oldest forty-five (45) years of age. There were six pairs of twins born.

The births exceeded the deaths by 252.

The accompanying tables show the births according to months and wards, and ages and nativity of mothers. There is also a table showing the births in the institutions by months.

TABLE I—BIRTHS BY MONTHS AND WARDS

Months	N. R.	I	II	III	IV	V	VI	Totals

COMMUNICABLE DISEASES

During the year we had a very mild epidemic of scarlet fever.

The accompanying tables show the number of cases of each disease reported during each month of the year, also the number of cases of each disease as compared with the number for the six years preceding.

SANITARY INSPECTION

During the year, kitchens, restaurants, barber shops, meat markets, bakeries, stores and different manufacturing plants, and all of the moving pictures houses are visited frequently. In many instances, it was necessary to issue orders to persons in charge of these establishments to always keep in mind the health regulations. There were many complaints made to the Health Officer concerning public nuisances. These complaints required personal attention, and orders were given to abate these nuisances.

PLUMBING

During the year, there were 109 permits issued to contractors of Burlington for installation of plumbing which was inspected and tested upon its completion.

CITY DUMP

The City dump, located at the corner of Oak and First Streets, is well taken care of at present. Every spring the Board of Health ex-

pends a considerable sum of money in cleaning up some of the dumps and other places about the City. I would call attention to the city carters, truckmen and other person carrying rubbish about the City to be careful not to overload their vehicles, so that the rubbish will not fall into the streets.

RECOMMENDATIONS

Garbage.—The garbage system which has given good satisfaction could be improved if some persons would have proper garbage cans and keep these covered. The garbage should be kept free from ice, snow, cans, broken crockery, etc.

The Visiting Nurses' Association, in which the City of Burlington is much interested, and appropriates annually $3,000 to carry on that commendable work, needs all the encouragement and help from the people of the City to continue its work. In order that this work may be continued, it will be necessary for the City to appropriate the annual amount.

Respectfully submitted,

J. W. COURTNEY, M. D.,
Health Officer.

REPORT OF

VISITING NURSES' ASSOCIATION

Prenatal calls	3,295
Child welfare calls	4,887
Assisted at deliveries	259
Babies weighed at center	1,172

This is the report for the fifth year of Child Welfare Work in Burlington. Every phase of the work shows a marked increase and as our infant mortality shows decrease the work has been carried on very much in the same way as the previous four years. Each expectant mother is visited as before, reporting conditions to the attending physician. Attendance at delivery whenever requested, also giving aftercare. The babies are carried from various periods of three months to a year, depending on home conditions. The center is well patronized every Wednesday afternoon and the mothers show a keen interest as to the welfare of their babies.

There is always a waiting list of prenatals so that we never have to look up new patients. The mothers oftentimes call for the nurse without solicitation. At the present time we have under our care 95 expectant mothers, 130 babies under three months, and 150 babies coming to be weighed.

MRS E. L. INGALLS,
President.

REPORT OF THE

MILK INSPECTOR

FOR THE YEAR 1926

To the Honorable City Council:

The following comprises the second annual report to be submitted from the Milk Inspection Department.

In February the revision of the ordinance which had been made in 1925 and which required that all cows supplying milk to the City be tuberculin tested annually, was put in full force. Less difficulty than was anticipated was experienced in successfully enforcing this measure.

In May the licenses of all milk dealers were renewed and 134 retail and 40 wholesale licenses were issued. The revenue from these increases the funds in the city treasury by $1,067.

Only one prosecution was carried out during the year and that resulted in the conviction of a dealer for selling milk without having first secured a license. Evidence for the prosecution of a producer for selling adulterated milk was referred to the State's Attorney but no action was taken.

Samples of milk for analysis were purchased at irregular intervals from the distributors. A table summarizing the results of these analyses appears at the close of this report. Statements of these analyses were returned to the dealers promptly each time with suggestions for overcoming existing deficiencies.

In accordance with the regulations, the reports of analysis, as determined at the State Board of Health Laboratories, were published in the press. The publishing of these reports has served as a guide for many consumers in selecting the grade of milk which they desire and it has also proved to be a stimulus to dealers to consistently market a high-class product. The records indicate that over 80 per cent. of the regular milk dealers have improved the quality of their milk during the past year.

Improvement was brought about further by sanitary inspection of all farms and dairies supplying milk to the City. The establishments of city dealers and store refrigerators were inspected periodically and these can be said to be in good condition.

In addition to the samples reported in the accompanying table approximately 175 samples of milk were procured directly from producers during the hot weather. The samples were practically all physically clean but a large percentage were high in bacteria, indicating improper cooling. Considerable time was expended to correct the condition at that time but through lack of ice on the farms it was not possible to accomplish the desired results. In view of that, all producers have been urged to store an ample supply of ice this winter so that similar trouble will not occur next summer and that the City's milk supply may be still further improved.

Respectfully submitted,

W. B. SILCOX,

City Milk Inspector.

Table summarizing the results of analyses of milk samples procured from distributors during 1926:

REPORT OF THE

MEAT INSPECTOR

Burlington, Vt., January 24, 1927.

The Honorable City Council, Burlington, Vt.:

GENTLEMEN:—I herewith submit the following report as Meat Inspector for the year 1926:

Number of beef carcasses inspected	821
Number of veal carcasses inspected	1,400
Number of pig carcasses inspected	2,323
Number of lamb carcasses inspected	183
Number carcasses inspected (all kinds)	4,727
Number carcasses condemned (all kinds)	123
Number parts of carcasses condemned (all kinds)	9
Number of store and market inspections	732
Number of slaughter house inspections	64
Number of complaints investigated	7

The sanitary conditions of market refrigerators are very satisfactory.

Respectfully submitted,

DR. H. L. MILLS,
Meat Inspector.

REPORT OF THE

BOARD OF POLICE COMMISSIONERS

To the Honorable City Council:

GENTLEMEN:—We herewith submit our report for the year ending December 31, 1926.

During the year we have held meetings from time to time, but have had only one meeting to investigate charges against a member of the force, and are glad to be able to report "charges not proved."

Discipline has been good, and we believe the personnel was never better.

We extend our thanks to his Honor, Mayor C. H. Beecher, the Board of Finance, the Chief and Deputy Chief of Police, and to each member of the department for their unfailing courtesy and loyal support.

O. E. LUCE,
M. C. TWITCHELL,
E. H. McGRATH,
Board of Police Commissioners.

Burlington, Vt., January 25, 1927.

REPORT OF THE

CHIEF OF POLICE

To the Honorable City Council:

GENTLEMEN:—I hereby submit my report for the year ending December 31, 1926.

The records show that during the year the number of arrests made by the department was 301, which are classified as follows:

Assault with intent to kill	1
Assault with intent to rape	1
Breach of peace	26
Burglary	13
Forgery	1
Gambling	20
Keeping house of ill-fame	1
Grand larceny	6
Intoxication	131
Non-support	9
Night-walking	4
Obtaining money under false pretense	7
Open and gross lewdness	2
Operating automobile under influence of liquor	9
Operating automobile without license	14
Operating automobile in careless manner	12
Operating automobile with three on driver's seat	7
Petit larceny	4
Prostitution	6
Tramp	5
Violation of liquor law	18
Violation of city ordinance	4
	301

Frank A. Lavery	Clarence E. Weston

Amount appropriated for the Police and Criminal Department, $48,000.

Pay roll, $48,560.63.

This department has paid to the City Treasurer for services of warrants the sum of $936.06.

I wish to thank the members of the department for the careful performance of their duties during the past year.

In conclusion I desire to thank his Honor, Mayor Clarence H. Beecher and the Police Commissioners for the kind treatment received.

Respectfully submitted,

P. J. RUSSELL,

Chief of Police.

REPORT OF THE

POLICEWOMAN

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—I herewith respectfully submit my ninth annual report for the year ending December 31, 1926.

The year has been a busy one, occupied mostly in investigating cases that have come to my attention and with personal work with girls and women.

Scarcity of work has made it necessary to help many in various ways. The Woman's Protective League, Inc., have given substantial aid in this work and through them I have been able to care for many needy cases.

Commitments have been made to the State Prison and House of Correction for Women at Rutland, State Industrial School at Vergennes and State School for Feeble-minded at Brandon.

During the past year supervising of the dance halls has not been strenuous as the managers cooperate and the halls have been well chaperoned.

I wish to thank his Honor, Mayor Clarence H. Beecher, Chief Russell, Deputy Chief Cosgrove and Sergeant Ryan, also the Woman's Protective League, Inc., and all others who have made it possible for me to do this work.

Respectfully submitted,

(MRS.) N. E. L. AUSTIN,

Policewoman.

Deputy State Probation Officer for Women.

REPORT OF THE

CLERK OF THE MUNICIPAL COURT

Burlington, Vt., January 18, 1927.

To the Honorable City Council:

GENTLEMEN:—During the calendar year 1926, seven cases of violation of City Ordinances were entered into the records of this Court. There were six convictions and one respondent was found not guilty and discharged after trial. Of the six respondents convicted, five of these paid a fine or fine and costs, and in one case mittimus was issued for nonpayment of fine and costs.

The following is a classification of the seven cases which were disposed of:

Operating automobile at a speed exceeding 15 miles per hour	2
Automobile passing street car while passengers were getting on and off the car	1
Marking inscriptions on a public building	1
Refusing to obey the orders of a police officer	1
Operating automobiles for hire, between fixed termini	1
Selling milk without having license	1
Total	7

Receipts:

Fines collected	$22.00
Costs collected	16.08
Total	$38.08
Paid to the City Treasurer	$38.08
Returned to Court for Clerk's fees	$7.00
Due to witnesses	1.83
Total	8.83
Net to City	$29.25

Respectfully submitted,

ADRIAN J. SIMAYS, Clerk.

REPORT OF THE

CITY GRAND JUROR

To the Honorable City Council of Burlington:

GENTLEMEN:—I herewith submit my report as City Grand Juror for the year ending December 31, 1926.

RECORD OF CASES PROSECUTED

Breach of the peace	17
Burglary	4
Criminal assault	1
(Bound over to County Court 1)	
Delinquent children	2
Gambling	13
Grand larceny	5
(Bound over to County Court 5)	
Habitual drunkard	6
Intoxication	115
Keeping gambling resort	3
Night walking	2
Non-support	4
Obtaining money under false pretenses	2
Petit larceny	2
Possessing, selling, furnishing intoxicating liquor	14
Prosecution under the laws of 1919, No. 180, Section 7036	3
Prosecution under the laws of 1919, No. 199, Section 1	1
Receiving stolen property	1
Vagrancy	2
Violations of the motor vehicle laws:	
Driving while intoxicated	10
Driving unregistered automobile	6
Driving unregistered motorcycle	1

Driving without a license	6
Leaving scene of accident	2
Negligent driving	1
Operating automobile without consent of owner	1
Riding three on front seat	5
Nol prossed	35
Total	264

Of the above cases nol prossed, most of them were discontinued because of the lack of substantial evidence to be presented to the court. In several non-support cases the charges were nol prossed because the husband agreed to take care of the family, which proved more satisfactory than prosecution.

I wish to thank the Chief of Police and members of his force for the support given and all others who have assisted me in the performance of my duties.

Respectfully submitted,

CONSUELO B. NORTHROP,

City Grand Juror.

REPORT OF THE

CITY ATTORNEY

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—Since my last report was rendered I have attended at Montpelier the final hearing before the Public Service Commission in the matter of the application of the New England Telephone & Telegraph Company for an increase in telephone rates. Final decision was rendered in favor of the company, but the practice of discounting the rates to municipalities was forbidden and some discount was made in the rates requested for private branch exchanges and some rural lines.

I have had but few complaints for violation of the city ordinances and no suits have been brought against the City and none are pending in favor of the City. However, my time has been quite fully employed with the routine duties of my office.

A lease of the right of way from the Central Vermont Railway Company for an annual rental of one hundred dollars for the main transmission line connecting the electric light plant with the lines of the Public Electric Light Company has been agreed upon and differences between the Central Vermont Railway Company and the City regarding the construction and location of the company's signal system at the foot of Depot Street are in course of settlement.

After the next meeting of the Board of Abatement I shall have prepared and present to the State Tax Commissioner a proper bill for rebates due us from the State on abatements for the past six years. The Tax Collector has but recently placed in my hands for action a number of taxes and assessments and I shall bring action on these where necessary as soon as possible.

I have prepared a draft of proposed amendments to the city charter which will shortly be presented for your consideration.

A good part of my time has been occupied in the consideration of matters in connection with the construction of the new City Hall, Fire Station and Memorial Auditorium and the officials of the various

city departments are constantly requiring more of my time for consultation with regard to many changes and improvements that are being made or proposed.

In view of the extensive building program upon which the City is now engaged, the progress that is being made in many directions and the increase of matters which demand the attention of this office, it should be a source of great satisfaction that the City has been involved in no litigation during the past year.

Respectfully submitted,

THEO. E. HOPKINS,

January 19, 1927. City Attorney.

REPORT OF THE

ELECTRIC LIGHT COMMISSIONERS

To the Honorable City Council, City of Burlington, Vt.:

GENTLEMEN:—We submit our annual report together with that of the Superintendent of the Electric Light Department for the year ending December 31, 1926.

Another year of successful operation of the Electric Light Department has passed. During the year the distribution system has been improved and overhauled wherever possible; joint pole lines have been constructed and this plan makes for the improvement of the appearance of the streets of the City and will, in our opinion, be followed wherever possible. These changes have not all been completed, but will be finished during the coming year. Another important change is being made in the line running between the hydro-electric generating station at Fairfax Falls to the steam generating station on the water front in this City. Formerly the transformers of this line were located on North Avenue some distance from the plant itself. The new plans contemplate the installation of larger transformers located very near the steam station and of carrying high voltage lines directly to these transformers. This change is being made by the Public Electric Light Company and the Electric Light Department and will result in improved voltage regulation, added transformer capacity, and better service in general.

During the past year the Public Electric Light Company has purchased the International Paper Company's water power at Milton and this is now being developed. Electric generators will be installed and connected to the present water wheels; after this is done a transmission line will be built connecting this station to the present Fairfax line now extending from Fairfax Falls to Burlington, and will give the department another hydro station to depend on in case of any interruption from Fairfax Falls station. It is also possible that another source of power will be made available for the use of the City in the coming year. We believe that with the physical condition of

this department, in as good condition as it is, any increase in the gross operating revenue will be largely reflected in net profit, and that this in turn works out to the financial benefit of all taxpayers of the City. With these things in mind we look forward to 1927 with a feeling of confidence that all the citizens of the City will take advantage of the facilities offered by this department and for additional successes in the coming year.

H. H. MILLER,
R. N. HILL,
E. F. GEBHARDT,
Board of Electric Light Commissioners.

REPORT OF THE

ELECTRIC LIGHT DEPARTMENT

To the Board of Electric Light Commissioners, Burlington, Vt.:

GENTLEMEN:—I submit herewith my annual report for the year ending December 31, 1926.

In view of the fact that 1926 shows a slight decrease in net earnings, when compared with 1925 it may be proper to offer this explanation:

The street light appropriation was reduced several thousand dollars, without any immediate reduction in the size of lamps, and upwards of $7,000 worth of fuel oil has been consumed in maintaining boiler pressure at our steam plant for the past eleven months, in an effort to assure continuity of service.

In submitting this, my sixth and last report, I wish to acknowledge the debt I owe for your whole-hearted support and untiring interest which alone has made possible the progress accomplished. While there remains much to be completed, we have paid the overdraft of 1919, which was more than $50,000, and turned over to the City Treasurer almost $160,000 for the sinking fund. We have installed ornamental lighting and underground distribution in the business section, materially improved our outside plant, added turbines and boiler capacity to our steam equipment and installed oil burners that have improved our efficiency to a marked degree.

I am confident that the department under your direction will go on to larger achievements and continued and greater prosperity, and shall leave to the incoming superintendent any recommendations of future needs and policy.

Respectfully submitted,

M. G. CLARK,

Superintendent.

THIRTY-EIGHTH ANNUAL REPORT

OF THE

WATER COMMISSIONERS

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—The Board of Water Commissioners herewith submit their report for the year ending December 31, 1926.

The receipts from the water rates have been $100,505.11. The unpaid water bills, which are 167 in number, amount to $694.50. The pumpage for the year was 524,649,000 gallons, a decrease of 12,823,000 gallons over last year.

The expenditures of the department was $2,969.22 less than the appropriation, but owing to the overdraft of $4,595.26 in 1925 which we paid this year we have an overdraft of $1,626.04 this year.

Sixty-nine new services were replaced on account of permanent road work.

One thousand eight hundred and seventy-five feet of six-inch cast iron main was laid.

The repairs which the department planned to make on the Filter Plant have been completed by the department for $8,500 less than the estimates we received.

The Commissioners feel that the department has been run very efficiently and as economically as possible by their Superintendent, Mr. Joseph E. Moore.

The bonded indebtedness of the City on account of this department is as follows:

Four per cent. bonds due in 1928$51,000 00

Respectfully submitted,

DELL L. SANDERS,
J. LINDLEY HALL,
E. O. MITIGUY,
Water Commissioners.

FIRE HYDRANTS

Number of public hydrants now in use 236
Number of private hydrants now in use 50

Total number of hydrants 286

No new hydrants have been added.

Hydrants have been replaced in the following places:
1 at corner of Buell and S. Union Streets.
1 at corner of Main and S. Willard Streets.
1 at corner of Murray and Allen Streets.
1 on Washington Street.

Hydrants moved to new locations as follows:
1 at corner of Chase and Barrett Streets.
1 on Pine Street at Adsit Coal Company.

Hydrants have been repaired in the following places:
1 on Lake View Terrace.
1 on Pine Street at Dorn's.
1 on S. Prospect Street at Clark's.
1 on Ledge Road.
1 at Mary Fletcher Hospital.
1 at 96 Colchester Avenue.
1 at corner of Maple and Summit Streets.
1 at corner of Wright and Conger Avenues.
1 at corner of S. Prospect and Pearl Streets.
1 at corner of Maple and Pine Streets.
1 at corner of Colchester and East Avenues.
1 at corner of Bank and St. Paul Streets.
1 at corner of Maple and S. Willard Streets.
1 at corner of Main and S. Champlain Streets.
1 at corner of Spring Street and Elmwood Avenue.

MAINS

New mains have been laid with 6-inch cast iron pipe on:

Ferguson Avenue	509 feet
Berry Street	240 feet
Charlotte Street	566 feet
Foster Street	413 feet
Proctor Avenue	60 feet
Gove Court	57 feet
Nash Place	30 feet
	1,875 feet

Mains have been replaced as follows:

Mansfield Avenue and Colchester Avenue, 53 feet of 4-inch pipe replaced by 6-inch.

Nash Place and Colchester Avenue, 30 feet of 1¼-inch pipe replaced by 6-inch.

REPAIRS

On cast iron pipe	5
On services	22
On hydrants	15
On cement mains	3
On fire services	3

SUPPLY PIPE

81 feet of 1-inch pipe laid on Strong Street.
330 feet of 2-inch pipe laid on Williams Street.
391 feet of 1½-inch pipe laid on Gove Court.

SERVICE PIPES

60 services of the following sizes have been added:

1	¾-inch
54	1-inch
3	1¼-inch
2	2-inch

Seventy-two have been discontinued and replaced as follows:

69 ½-inch replaced by 1-inch.
1 ¾-inch replaced by 1½-inch.
1 1-inch replaced by 2-inch.
1 1½-inch replaced by 2-inch.

Method of Repairing Filtration Plant—Cement Applied Under Pressure

LENGTH OF PIPE NOW IN USE

Cement	11,549 feet	about 2.18 miles
Cast iron	235,273 feet	about 44.56 miles
Total mains	246,812 feet	about 46.74 miles
Service pipe	158,167 feet	about 29.95 miles
Supply pipe	39,759 feet	about 7.53 miles

GATES

Gates added during the year	24
Total number of gates now in use	933

GATES REPAIRED

Two gates repaired in the following places:

1 at Van Ness Hotel on St. Paul Street.

1 at Filter Plant.

Filtration Plant—Repairs Completed

STAND PIPES

One stand pipe was repaired on the corner of S. Willard Street and College Street.

WATERING TROUGHS

Four watering troughs have been repaired at the following places:

1 on Lake Street.

2 on Shelburne Street.

1 at Battery Park.

CURB STOPS

Four curb stops have been replaced at the following places:

1 at 344 North Street. 1 at 213 N. Winooski Avenue.
1 at 537 S. Willard Street. 1 at 1477 North Avenue.

BLOW OFFS

One blow off has been discontinued on Ferguson Avenue.

HIGH SERVICE

District supplied: South side of Colchester Avenue from University Place to East Avenue, East Avenue, Main Street from Summit Street to University Place, Mansfield Avenue and from Mansfield Avenue to N. Prospect Street on Loomis Street, Wilson Street and North Street to N. Prospect Street, S. Prospect Street, south of Main Street, Summit Street, University Place and Williston Road.

The consumption on the high service as indicated by the amount measured to consumers through meters was 36,692,200 gallons.

LOW SERVICE PUMPING STATION

1926	WATER PUMPED
January	39,731,000
February	38,036,000
March	43,608,000
April	40,532,000
May	40,798,000
June	42,731,000
July	48,055,000
August	54,675,000
September	47,526,000
October	45,242,000
November	42,184,000
December	41,531,000
Total 1926	524,649,000
Total 1925	537,472,000
Decrease	12,823,000
Daily average 1926	1,470,271
Daily average 1925	1,472,526

Average daily consumption per capita, 58.8 gallons.

Average daily run, 12 hours, 30 minutes.

One hundred and thirty-five curb and gate boxes were raised or lowered, extended and wholly or partly replaced.

The department responded to 511 calls to open or shut the stops at curb. There are 33 two-inch stand pipes available for street sprinkling. The watering troughs are inspected once a week and cleaned and are also kept clear of ice in winter.

There are now in use 4,453 meters, an increase of 105 over last year. Forty-nine meters were frozen and 1,168 were removed and replaced for other reasons, such as street work, cleaning, repairs, etc.

Five hundred and eighty-two postals were mailed to consumers, calling attention to excessive use, waste or leakage, as reported by our inspectors.

Consumption high service 1926 36,692,200 gallons
Consumption high service 1925 33,756,000 gallons

In 1925 our cash receipts were $89,102.51 and $100,505.11 in 1926, showing a gain of $11,402.60 over the previous year. This gain is due to increase in rates and additional new services.

Five hundred and nine feet of 6-inch cast iron main was laid on Ferguson Avenue from about 100 feet east of Pine Street, to Foster Street. Two hundred forty feet of 6-inch cast iron main was laid on Berry Street to connect up a dead end on Lake View Terrace with North Avenue.

Five hundred and sixty-six feet of 6-inch cast iron main was laid on Charlotte Street.

Four hundred and thirteen feet of 6-inch cast iron main was laid on Foster Street.

Sixty feet of 6-inch cast iron main was laid at Proctor Avenue and Shelburne Street.

Fifty-seven feet of 6-inch cast iron main was laid on Gove Court.

Thirty feet of 6-inch cast iron main was laid on Nash Place, to replace the 1¼-inch.

Fifty-three feet of 6-inch cast iron main was laid on Mansfield Avenue to replace a 4-inch; the Mansfield Avenue and Nash Place mains were increased across Colchester Avenue to take care of future development without going into the permanent road on Colchester Avenue. There are still 2.18 miles of cement main on different streets and I would recommend the change to cast iron as soon as possible, as breaks on these old lines occur quite frequently, causing great

inconvenience to the public and expense to the department. Last year the department planned to renew a piece of cement pipe on Willard Street and bought the pipe, but we had to change our plans to take care of the new buildings on Ferguson Avenue and Foster Street. We expect to put in this work in the spring.

A new thawing machine was purchased by the department last fall which makes it much easier and quicker to thaw out frozen services and give the public a great deal better service.

The department also connected the high service fire pump at the reservoir with the Burlington Light and Power Company's power at a cost of about $1,500, thereby giving better fire protection to that part of the City which depends on the high service. The Burlington Light and Power Company allowed us to connect to their wires and to use their power if it would ever become necessary free of charge, thereby showing that they had the interest of the public at heart and the department wishes to take this way to thank them.

The Filter Plant was repaired last May. The work was done by the department at a cost of $7,500. A cement gun, and three men who were skilled in using it, was borrowed from the city of Rutland. A coat of cement 1¾ inches thick was shot on both the inside and outside of the whole plant; this was put on under a pressure of about 90 pounds and we feel that we have a good job. An out-of-town firm estimated the job at $16,000 and we completed the job for $7,500, thereby making a saving of $8,500 for the City.

The amount of water pumped in 1925 was 12,823,000 gallons more than what was pumped in 1926. The reason for this was a large leak in a broken main in 1925 and the leaks that were stopped at the Filter Plant by the repair. The average daily run of the pumps was cut down 27 minutes but our power bill was increased about $4,000 over last year's bill by an increase in rate.

A great deal more work should be done at the Filter Plant. Two more filter beds and another clear well should be added and the department intends to do this out of their appropriation just as soon as they can.

Respectfully submitted,

JOSEPH E. MOORE,

Superintendent.

FILTRATION PLANT, BURLINGTON, VT.

SUMMARY OF STATISTICS

For the Year Ending December 31, 1926

In Form Recommended by the

NEW ENGLAND WATER WORKS ASSOCIATION

Burlington City Water Works.
Burlington, Chittenden County, Vermont.

GENERAL STATISTICS

Population by census of 1920: 22,879.
Date of construction: 1867-68.
By whom owned: City.
Source of supply: Lake Champlain—Filtered.
Mode of supply (whether gravity or pumping): Pumping.

PUMPING STATISTICS

Builders of pumping machinery: H. R. Worthington and Laidlaw-Dunn-Gordon Company.
Electricity purchased from the Municipal Electric Light Plant.
Total pumpage for the year: 524,649,000 gallons.
Average head against which pumps work: 289 feet.
Average dynamic head against which pumps work: 316 feet.

STATISTICS OF CONSUMPTION OF WATER

1.	Estimated population at date	25,000
2.	Estimated population on lines of pipe	25,000
3.	Estimated population supplied	25,000
4.	Total consumption for year (gallons)	524,649,000
5.	Average daily consumption (gallons)	1,470,271
6.	Gallons per day to each inhabitant	58.8
7.	Gallons per day to each consumer	58.8
8.	Gallons per day to each tap	303

STATISTICS RELATING TO DISTRIBUTION SYSTEM

MAINS

1. Kind of pipe: Cement lined, cast iron, wrought iron.
2. Sizes: From 4 to 30 inch.
3. Extended during the year: 1,845 feet.
4. Discontinued: 0.
5. Total now in use: 44.56 miles.
6. Length of pipe less than 4 inches diameter: 7.53 miles.
7. Number of hydrants added during the year: 0.
8. Number of hydrants (public and private) now in use: 286.
9. Number of stop gates added during the year: 19.
10. Number of stop gates now in use: 829.
11. Number of stop gates smaller than 4-inch: 104.
12. Number of blow offs: 14.
13. Range of pressure of mains: Average 70-85 pounds.

SERVICES

14. Kind of pipe: Galvanized, cast iron and lead.
15. Sizes: ½ to 6 inches.
16. Extended: 1,825 feet.
17. Total now in use: 29.95.
18. Number of service taps added during the year: 60; discontinued: 0.
19. Number now in use: 4,857.
20. Average length of service: 29 feet.
21. Number of meters added: 105.
22. Number now in use: 4,453.
23. Percentage of services metered: 99.
24. Number of motors and elevators added: 0; discontinued: 0.
25. Number now in use: 29.

REPORT OF THE

STREET COMMISSIONERS

FOR THE YEAR ENDED DECEMBER 31, 1926

To the Honorable City Council:

MESSRS.:—The Board of Street Commissioners submit their report for the calendar year ended December 31, 1926.

REVENUES

Balances at January 1, 1926:		
Bond Issue, Construction	$ 7,899 15	
Snow removal	7,230 91	
		$ 15,130 06
Less overdrafts:		
Street account	$ 1,808 72	
Sewers account	269 54	
New equipment account	8,286 02	
		$ 10,364 28
Net balance		$ 4,765 78
Received from appropriations as follows:		
Streets	$ 51,756 10	
Sewers	10,000 00	
Sprinkling	10,000 00	
Snow removal	7,500 00	
Bridges	1,000 00	
Bond issue construction	55,548 78	
Sidewalks, curbs and gutters	16,000 00	
Williston Road	2,000 00	
Pine Street sidewalk	5,000 00	
		$158,804 88

Received from the State of Vermont:		
State aid	$ 3,064 79	
Amount matched by City	2,500 00	
		$ 5,564 79
Received from assessments:		
Sidewalks, curbs and gutters	$ 16,128 27	
Sewers	4,118 74	
		$ 20,247 01
Received from materials and labor accounts		51,357 67
		$240,740 13
Received from temporary funds:		
Potash Brook bridge appropriations 1927	$ 6,149 01	
Widening Winooski Avenue appropriations 1927	2,094 43	
New equipment appropriations 1927	8,286 02	
		$ 16,529 46
Overdrafts:		
Street account	$ 99 78	
Bond issue construction	1,081 11	
		$ 1,180 89
		$258,450 48

EXPENDITURES

Warrants drawn for materials and labor as follows:	
Streets	$100,300 04
Sewers	14,140 18
Sprinkling	10,849 76
Snow removal	8,572 23
Bridges	1,099 12
Bond issue construction	66,564 02
Sidewalks, curbs and gutters	32,255 66

Williston Road	5,167 98	
Pine Street sidewalk	5,000 00	
Potash Brook bridge	6,149 01	
Widening Winooski Avenue	2,094 43	
		$252,192 43

Appropriations closed as follows:

Sewers	$ 1 11	
Sprinkling	1 30	
Bridges	6 33	
Sidewalks, curbs and gutters	90 13	
Williston Road	50	
		$ 99 37

Appropriations open as follows:

Snow removal	$ 6,158 68
	$258,450 48

Respectfully submitted,
THOS. A. MAGNER,
HENRY H. HICKOK,
ARTHUR D. BUTTERFIELD,
Board of Street Commissioners.

Audited and found correct,
January 12, 1927,
FRANCIS C. DERBY CO.

REPORT OF THE

SUPERINTENDENT OF STREETS

FOR THE YEAR ENDED DECEMBER 31, 1926

RECEIPTS AND EXPENDITURES OF THE SEVERAL APPROPRIATIONS

STREETS

Excess expenditures, 1925			$	1,808 72
Appropriation from Grand List	$ 51,756	10		
State of Vermont:				
State aid, matched by City	1,500	00		
Resurfacing, matched by City	1,500	00		
Received from labor and materials account	47,252	88

	$ 7,203 42	$ 7,203 42

APPROPRIATIONS TO REFUND THE ADVANCE FROM TEMPORARY FUNDS USED IN THE FOLLOWING MANNER, ARE TO BE MADE DURING 1927

Potash Brook bridge	$ 6,149 01
Widening Winooski Avenue	2,094 43
New equipment	8,286 02

From the above accounts in the several branches of this department it will be noted that the only overdrafts are those shown under "Streets" and "Bond Issue" construction. The overdraft in streets was reduced from $1,808.72 as of January 1, 1926, to $99.78 as of January 1, 1927. The overdraft in Bond Issue which is $1,081.11 was occasioned by the necessity of finishing the job on Colchester Avenue which was somewhat more than the original plans called for. Also by the additional cost of track area work between Prospect Street and Mansfield Avenue occasioned by relocating the electric car line in the center of the street instead of rebuilding it outside of the travelled portion of the pavement near the south curb where it was originally placed.

All other branches of the department show an unexpended balance at the close of the year. It has been our policy to keep within our appropriations if possible and we have been able this year to do this because of the few jobs which have been of an extraordinary or emergency nature.

As an offset against the above-mentioned overdrafts we now have on our books, accounts receivable which are due and collectable over $1,900.00.

STREETS

Pavement Construction.—The pavement construction for this year was primarily Bond Issue work but I will report on that work under a separate heading on Bond Issue work which will be found elsewhere in this report.

View of Williston Road, Looking East From University Place
This is a stone-filled sheet asphalt pavement constructed this year, with a one and one-half inch binder course and a one-inch wearing course.

Class "A". The main construction job of a class "A" type was that of Williston Road which was done under a special appropriation. This was a continuation of the construction work of 1925 on Williston Road, beginning at University Terrace and continuing westerly to a point a few feet west of University Place. This construction was identical with the construction of the previous year on this same road as to materials and type of construction. The total area of this new pave-

ment was 2,998.4 square yards. The unit cost of this job including all materials and labor, engineering, inspection, maintenance and repairs of equipment, etc., was $2.50 per square yard.

We received State Aid on this job to the amount of $564.79 from the 5% fund and $1,000.00 from the construction fund, the remainder of the cost was met by special appropriations from the City.

In addition to the paving work on this job several hundred feet of concrete curbing was constructed and the old stone curbing at the entrance to University Place was reset so as to allow for a pavement width of 30 feet on University Place. Three trees were removed at the intersection of University Place and Williston Road and a heavy stone base was constructed in this area before the pavement was surfaced. This now gives us a new asphalt pavement from Unversity Place to the city limits on Williston Road which is one of the main thoroughfares for traffic entering or leaving the City.

Another job which comes under this head was the widening of South Winooski Avenue between College Street and Main Street. Here the proposition was to widen the street sufficiently to allow easy entrance and exit of the fire apparatus to and from the new Fire Station without endangering traffic. In order to accomplish this purpose the old stone curbs on the easterly side of the street were removed and new concrete curbs were constructed ten feet easterly. A new concrete pavement was constructed on this space thus made. This gave a total street width of 40 feet between curbs. New concrete sidewalks were also constructed on the easterly side of the street. New concrete radius curbs were constructed at the intersections of College Street and Main Street and the catch basin at the corner of Winooski Avenue and Main Street was rebuilt as well as under-ground connections from the manhole in the street to the electric light poles at the intersection. The total cost of this job was approximately $2,100.00 which was met by a special appropriation from the City. This work was nearly all constructed during cold weather and calcium chloride was used in the mixtures to hasten the time of setting of the concrete. The materials were also heated while being mixed by the use of a Hauck Burner. The use of the calcium chloride and heater was more or less an experiment but from all indications thus far we have not noticed any bad effects from the cold weather.

Class "B." Under this type of pavement I would mention the con-

struction of Charlotte Street from Catherine Street southerly approximately 400 feet. The foundation for this job was laid in 1925 with salvaged materials taken from other construction jobs. This year a 3-inch layer of crushed stone was rolled in place and an application of one-quarter of a gallon per square yard of light No. 4 Standard Road Oil was given, then an application of one and one-quarter gallons per square yard of 50-60 penetration asphalt was applied, the surface then being covered with a light layer of 1½-inch stone and thoroughly rolled, then a third application of a one-quarter of a gallon per square yard of 50-60 pentration asphalt was given to the entire surface and ¾-inch stone was spread to a depth of one inch over the entire surface and thoroughly rolled after which the street was opened to traffic. The application of the asphalt was done by means of the Standard Oil distributing truck at a nominal charge per gallon. The heavy asphalt used was the same as that which we are using for our hot-mix pavements and was drawn from the storage tank at the Asphalt Plant ready for use. This is a very satisfactory type of pavement where it is not to be subjected to heavy or intense traffic, and is also economical in construction.

Resurfacing.—Several jobs were done with salvaged material from the several Bond Issue jobs. The method being that of spreading the material to a required depth of four to ten inches in thickness necessary to bring the surface of the street to an even grade, machining and rolling the same and in some cases treating the surface with Tarvia "B", after being subjected to traffic long enough to compact the material beyond the point where it would become displaced or rutty under traffic. Some of the streets which received this method of resurfacing were South Prospect Street from Cliff Street to the Class "B" asphalt construction in front of Dr. Twitchell's; North Street from North Prospect Street to Mansfield Avenue; Fletcher Place from Colchester Avenue to the north end; Chase Street from Barrett Street to the south end including the intersection of Grove Street; East Avenue from Williston Road northerly approximately 1,300 feet.

Some resurfacing was done with cinders obtained from the schools and from the Queen City Cotton Company as well as from the Central Vermont and Rutland Railroad Companies. The streets resurfaced with cinders were Briggs Street and from Park Avenue to Ferguson Avenue and Lyman Avenue from Foster Street to Richardson Street.

Maintenance.—All streets have been maintained under the patrol system as heretofore and according to our reports we find that we have over 600,000 square yards of pavements maintained under this system. The unit cost per square yard for the year was $0.025 or based on a mile of 18-foot pavement we find that we are maintaining the equivalent of 60 miles of 18-foot pavement at a unit cost of $263.58 per mile.

Asphaltic cold-patch material mixed with ¾-inch crushed stone and stone dust or screenings has been used for all of our patrol work. The maintenance part of our construction program is of vital importance and we find that although we are constructing additional mileage each year of so-called permanent pavements, we are also adding a certain mileage to an equal or greater amount to the secondary streets which need more maintenance and attention because of their inferior surface. In other words our maintenance cost remains about the same for the year in spite of the fact that we are constructing new pavements each year which demand very little if any maintenance attention for the first few years. It might be well to state at this time that no maintenance has been necessary on any of the asphalt pavements constructed during the last few years except where cuts have been made through the pavements for underground work or where track area have broken up at bad rail joints. No maintenance has been necessary on the concrete pavement construction except the maintenance of the expansion joints which is a very small item when considered in terms of square yards in comparison with the original cost.

Street Cleaning.—The Elgin Street Sweeper and the Elgin Eductor have done the major part of our street cleaning operations during the past two years with increasing success and I feel that these two units have been well worthwhile and have saved the City considerable money over the old hand method. A copy of the annual report for the Elgin Street Sweeper and the Elgin Auto Eductor will be found in this report and I believe they will speak for themselves as to the efficiency of these two pieces of equipment.

Catch Basin Cleaning.—You will note from the report on cleaning catch basins that the Elgin Auto Eductor cleaned 375 catch basins at a unit cost of $3.57 per catch basin also that from these catch basins it cleaned 885 cubic yards of dirt at a unit cost of $1.51 per cubic yard. These unit costs are less than those reported for the same work last

year which means that the equipment was handled more efficiently and the work was accomplished in much less time than last year which made the equipment available for other kinds of work a greater part of

"The Elgin" Street Sweeper

This machine was purchased in 1923 and during its four years of service it has operated over 12,000 miles of pavements, cleaned more than 73 million square yards of pavements and picked up over 12,000 cubic yards of street dirt. This picture shows the ease in which the machine can be operated, also the manner of dumping the dirt into a neat pile against the curb after having been collected.

the season. This equipment when not in use cleaning catch basins and flushing streets was put into service doing odd jobs such as flushing sewers, pumping out trenches, flooded cellars, hauling stone, etc.

ANNUAL REPORT OF STREET CLEANING DEPARTMENT FOR THE YEAR 1926

ELGIN No. 1

Month	Gasoline	Oil and Grease	Brooms	Disposal	Operator	Labor	Repairs	Total	Number of square yards cleaned	Number of cubic yards picked up
January							$ 159.84	$ 159.84		
February							178.65	178.65		
March							691.77	691.77		
April	$ 27.16	$ 4.90	$ 9.24	$ 116.60	$ 56.28	$ 46.83	500.35	761.36	917,428	231

SEWERS

Construction.—A considerable amount of sewer construction was done during the winter months of 1926 in the Scarff Addition section

ELGIN AUTO EDUCTOR

This Elgin Auto Eductor or catch basin cleaner was purchased in 1925 and during the two years in which it has been operated it has cleaned 760 catch basins from which over 2,200 cubic yards of dirt have been taken. It has flushed and sprinkled 13 million square yards of pavements. It has hauled more than 4,000 tons of crushed stone and other materials as well as operating a snow plow for plowing the streets in the winter and numerous other jobs.

of the City. The sections of streets in which sewers were constructed were as follows: Park Avenue from Foster Street to Briggs Street; Ferguson Avenue from Foster Street easterly to a point a few feet westerly of the Alley sewer; Scarff Avenue from the Alley sewer westerly to a point a few feet east of Wells Street; Lyman Avenue from Richardson Street easterly to a point a few feet easterly of Wells Street; Con-

vention Hall sewer from Ravine sewer to the proposed Convention Hall. The total amount of sewer construction was a little over 3,000 lineal feet. Manholes and catch basins were also constructed wherever necessary on the new lines as well as numerous other extra manholes and catch basins at various places in our sewer system where there was inadequate drainage and maintenance facilities. A list of the catch basins and manholes as constructed is given below:

LIST OF CATCH BASINS CONSTRUCTED DURING 1926

Name of Street	No.	Location
Park Avenue	1	S. W. corner of Foster St.
North Street	2	N. E. and N. W. corners of Mansfield Ave.
North Street	2	Midway between Elmwood Ave. and Winooski Ave.

Maintenance.—General maintenance work of keeping our sewer system free of obstructions, roots, etc., has been done during the year with our Sewer Turbine Machine as well as with our Elgin Eductor. We have found, however, that keeping our catch basins clean, by the use of our Elgin Eductor, has saved numerous obstruction maintenance costs. During the year we have made 73 new sewer connections for new buildings and replacement connections to old buildings. A greater part of this work was done by the Street Department and the cost of the work billed to the property owner.

SPRINKLING

A very little sprinkling with water was done this year except the flushing of the business streets and occasional sprinkling on streets where construction work was being done.

Oiling.—A surface treatment of Tarvia "B" was given to the main trunk line streets also residential streets which had not received treatment the previous year. Over 60,000 gallons of Tarvia "B" was used in surface treatment work during 1926. The total cost of furnishing and applying this Tarvia together with the cost of labor and trucks for sanding the same, including the cost of the sand was approximately $10,000.00. A certain amount of surface treating with Tarvia "B" was done for the Cemetery Department and Park Department, the cost of which was billed to the respective Departments.

It is our policy now to surface treat a certain number of streets during alternate years thereby reducing our surface treating costs. The most of our old water-bound macadam and gravel streets now have a sufficient covering of Tarvia and asphaltic oils to hold them without a treatment every year and as long as these streets are kept free from dirt there is no necessity for a dust-laying treatment. The only need of a surface treatment being that sufficient to take up the wear from year to year.

BRIDGES

Construction.—The only job under the head of bridge construction which we have done this year is that of Potash Brook Bridge. This, however, has only been started but construction work will continue throughout the winter with the idea of completing the concrete structure while the flow of the stream is at its lowest. Several hundred tons of crushed stone and sand have been delivered to the job as well as a large quantity of cement and approximately 18 tons of steel reinforcing rods. All excavation has been completed and form work is about to be constructed preparatory to placing the concrete base. The City has appropriated the sum of $13,000.00 and the State Highway Department has agreed to pay one-half of the total cost of the job not to exceed $5,000.00, therefore a total of $18,000.00 is available for the cost of constructing this project. Besides the concrete structure which is in the form of a large culvert 9 feet high by 13 feet wide measured on the inside of the structure and 98 feet long between head-walls, there will also be over 6,000 cubic yards of filling and several hundred cubic feet of excavation in widening and raising the roadbed to conform to the new plans. Approximately 1,000 yards of this filling has already been done but no more work will be done on filling until next spring.

Maintenance.—The regular maintenance of all bridges has been carried on during the year and an entirely new floor system has been constructed on the Winooski Bridge including new stringers and new lining plank which are placed under the wearing plank. All guard rails and bridge approaches have been properly maintained and painted. The cost of the maintenance work for the year was a little over $1,000.00 but a portion of this was billed to the Town of Colchester for work on Heineberg bridge and to the City of Winooski for work on the Winooski Bridge.

SIDEWALK, CURBING AND GUTTERS

Construction.—This branch of the Street Department work has been steadily increasing as to the amount of work required each year. This year we have constructed 23,829 lineal feet of concrete sidewalks, 6,966 lineal feet of concrete curbing and 3,031 lineal feet of concrete gutter. This amount of sidewalk, curbing and gutter construction cost over $35,000.00, approximately $19,000.00 of this cost was appro-

priated by the City and over $16,000.00 was received from assessments levied against the adjoining property.

The greater part of this work was constructed with Street Department forces, however, several jobs were constructed under contract by Mr. M. A. Bundy and Mr. Geo. Collins local contractors during the latter part of the season.

A complete list of the locations of the several construction jobs will be found in my report as City Engineer.

Petitions have already been received for future sidewalk, curbing and gutter construction, the estimated cost of which totals more than $20,000.00.

Maintenance.—Maintenance work such as leveling up of sidewalk slabs where they have been raised by tree roots, etc., also where repairs have been made to underground conduits as well as portions of old tar concrete walks, have been made as they have been brought to our attention by the abutting property owners and one-half of such maintenance cost has been billed to the abutting owner.

There is a considerable amount of work of this nature which should be systematically carried on each year but owing to the large amount of new work requested or petitioned for, there is very little money left for maintenance purposes.

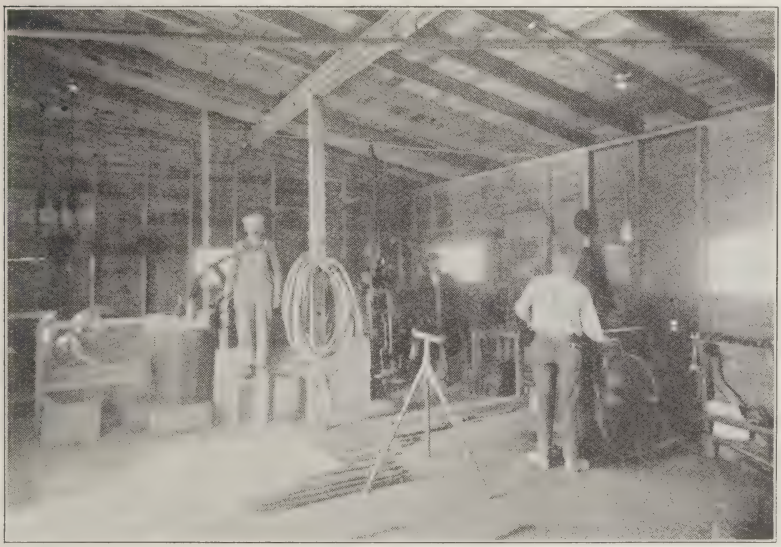

STONE QUARRY

More stone was quarried at the City Stone Quarry this year than any previous year since its purchase, the total amount for this year being 14,504 tons. This makes a total tonnage quarried to date of 41,523.5 tons and expressed in terms of money this represents over $83,000.00 at the average rate of $2.00 per ton. This in itself is quite a considerable amount of business for this one branch of our department. The Street Department itself used over 8,000 tons of stone in its construction work this year while over 6,000 tons was sold to contractors and individuals for construction of the new city buildings and private construction work throughout the City. The quarry has been operated continuously this year from the 15th of April until the first of January.

This has been a source of revenue for the Street Department as a small profit has been made on the amount of stone sold to private parties.

We now have on hand at the close of the year 879 tons including all sizes which will no doubt be an ample supply to take care of any demand until we start our quarry operations again in the spring.

Quarry Scales.—A special appropriation of $1,000.00 was made to the Street Department for the purchase and installation of a set of heavy duty truck scales at the City Quarry. Such a set of scales was purchased from the Fairbanks Scale Works and were installed early in the season. A scale house was also erected for the protection of the scales. These scales are capable of weighing loads up to 15 tons and may be used for slightly heavier loads if necessary.

Interior of Power House and Shop at City Rock Quarry

All drills are sharpened at this plant and all blacksmith and mechanical work in connection with the operation of the Rock Quarry is also done here.

All stone sold to private parties or delivered to the Street Department before leaving the quarry was weighed on these scales and a record of the same sent to the Street Department office for the purpose of checking the output from the quarry as well as billing for the same.

I feel that our City Quarry is one of the best pieces of property

that the City has ever purchased and the supply of stone is sufficient to last the City for several years and as to quality there is none any better in this section of the country for our particular type of work.

Our equipment is also a high-grade type of equipment. All of the air compressors and drills being Ingersoll-Rand motor driven and the crushing equipment being Acme Road Machinery Company equipment which is also motor driven.

View of City Rock Quarry

The City Rock Quarry, a portion of which is shown in this picture, comprises six acres of rock over which there is a shallow layer of earth stripping. The right of way leading from the Quarry to Williston Road is also a part of this property. More than 41,500 tons have been quarried during the last four years.

SNOW REMOVAL

A great deal of attention is now being given to the cities as well as towns and villages throughout this section of the country to the matter of keeping our streets and roads free from snow sufficient to enable all types of traffic to use the streets and roads with the least amount of hindrance during the winter months. The Street Depart-

ment has some very good snow-removal equipment, yet this equipment is not of the type which is necessary for the extreme heavy snow storms or for cleaning streets or roads of heavy-drifted snow. Our plows are of the straight-blade type attached to the front of our heavy-duty trucks. We should have at least one heavy-duty "V" type plow which can be used during heavy storms and attached to our 5-ton White truck. There is such a plow as I describe on the market which does very efficient work cleaning a road to the width of 18 feet in one operation. Such a plow would be of material aid to us and would save the City considerable money during the severe storms when the work becomes so heavy for the common-blade plows that we now have to resort to hand shovels to clean away the snow.

The change in franchise between the Burlington Traction Company and the City slightly increases the cost to the City for removing snow on the streets where the snow is hauled off where trolley lines exist. This fact, together with the fact that each year more snow-removal work becomes necessary, means that more money will necessarily have to be appropriated to cover the cost of this work. It is just as important that the streets and roads be kept open for traffic during the winter months as it is in summer, not only from the point of view of business and convenience but also to enable our motor-driven fire apparatus to get to and from fires in any part of the City without the danger of becoming stalled in the snow.

As a means of eliminating heavy drifting of snow at certain points on our outlying districts we have purchased and erected a trial order of one thousand lineal feet of "Big Red" snow fencing. This fence has proved very satisfactory and is a very economical way of handling these difficult places which heretofore have cost us considerable to open up, either by the use of the truck plows or by hand as has been necessary in some cases. Several thousand feet of this type of fence should be purchased for use another season. The cost is approximately $140.00 per thousand feet, and the erection is very simple and cheap. When the fence is not needed during the summer months it can be rolled up into compact form and stored in a small space.

MISCELLANEOUS WORK

New Central Fire Station.—By request of the City Council the Street Department undertook the excavation for the new Central Fire

Station building and the construction of the sub-foundation. This work was started in the late winter months after the old buildings of the old City Market had been torn down and removed. The excavation for the main building was completed and the sub-foundations were constructed early in the spring and then turned over to the contractor for constructing the main part of the building. After the main walls had been constructed the Street Department did all backfilling adjacent to the walls as well as a considerable amount of grading on the entire grounds. Late in the summer the excavation for the rear entrance to the build-

View of Parking System on Church Street, Looking North From College Street

ing was done by the Street Department as well as the construction of the manhole and sewer connections to the Ravine sewer in the rear of the building. Before starting actual construction work a series of load tests were run to determine the bearing power of the soil on which the footings of the building were to be constructed and from the results

of these tests the design of the footings were made. Similar tests were also carried on in regard to the Memorial Convention Hall. The information in both cases being given to the Architect, Frank L. Austin, to aid him in working out the design of the footings.

Traffic Zone Painting.—For the last two years the Street Department in conjunction with the Engineering Department have worked out a traffic-zone painting system which has been approved by the Chief of Police and all labor connected with the laying out and painting of this system has been done by Street Department forces and under the supervision of the Superintendent. Although this is strictly a police regulation and police duty it was felt that the Street Department was better equipped to handle this work. The cost of such materials and labor has been billed to the Police Department. The cost of which was $1,091.39. This amount, however, includes the cost of painting and erecting certain traffic regulation signs which were found necessary for the convenience of the traveling public.

An appropriation to cover the expense connected with this work should be made to the Street Department and included in the regular budget if the Street Department forces are to continue doing this work from year to year.

This system of traffic zone painting has worked out to good advantage here in Burlington and requests have come from other cities in the State for blue prints and information as well as from cities outside of the State so that they might use the same system in their cities which they felt had been successful here.

We have also been fortunate, after having made several trials of different kinds of traffic-line paint, to obtain a paint which will give service the entire season with but one application. This paint is obtained from the Pioneer Manufacturing Company of Cleveland, Ohio, and is a superior grade of white-line traffic paint.

CONCLUSION

It can be readily seen from the foregoing report that the Street Department has had considerable more work under construction during the past year than in any previous year in the history of the City.

The total amount of business carried on by the department during the year including the Bond Issue construction as well as the work

done of a more or less private nature, yet directly in connection with our City construction amounts to more than a quarter of a million dollars. In order to have executed this amount of work it has been necessary to have an organization which could be depended upon and assistants and foremen who were interested in their work and desirous of carrying out the orders to the best of their ability. I believe the Street Department has such an organization and I wish to take this opportunity of expressing my appreciation to the organization as a whole, and to those who have had a more responsible position, in particular for their whole-hearted cooperation, without which we would not have been able to accomplish the good results which I believe we have obtained during the past year. I also wish to extend the same appreciation to the Board of Street Commissioners and all other City officials and citizens who have in any way assisted me in the performance of my duties as Superintendent of Streets.

Respectfully submitted,

GEORGE C. STANLEY,

Superintendent of Streets.

REPORT OF THE

CITY ENGINEER

To the Honorable City Council:

GENTLEMEN:—I hereby submit my report as City Engineer for the year ended December 31, 1926.

All requests for lines and grades during the past year have been given in a proper manner and a considerable amount of work of the same nature has been given in connection with the laying out and erection of the several new city buildings. Surveys have been made of several plots of city property and monuments have been installed, marking the boundaries of the same, also certain street monuments which have been encountered in connection with new street construction work have been properly protected and in some cases reset in order to make them more accessible for use.

All work of an engineering character authorized by the City Council of a private nature has been done free of charge as well as the supervision and inspection of work which had to be done under the plans and specifications of the City Engineer.

The design of the concrete culvert to replace the old bridge at Potash Brook, also the design of retaining walls for the rear entrance to the new Central Fire Station as well as other similar designs of retaining walls in connection with sidewalk construction were all worked out in the office of the City Engineer and in the case of the concrete culvert, the plans were approved by the Chief Engineer of the State Highway Department before State Aid could be obtained for this job.

The inspection of all street openings, including the back-filling and resurfacing of the same after underground work had been completed, has been carried on under the supervision of the Engineering Department. The permits for street cuts as issued during the past year are as follows:

PERMITS FOR STREET CUTS, 1926

Total number of permits issued	313
Number permits for new gas services	213

Number permits for repairs to gas mains and services 38
Number permits for new water services 91
Number permits for repairs to water mains and services 26
Number permits for new sewer connections 76
Number permits for repairs to sewer mains and connections..... 9
Number permits for miscellaneous work, including telephone service, electrical underground, etc. 30

The difference between the number of permits issued and the distributed number is due to the use of blanket permits for new construction by the Water Department and Burlington Electric Light Department where permanent street work was anticipated.

SIDEWALK, CURB AND GUTTER CONSTRUCTION

All lines and grades, together with the plotting of maps for construction and assessments have been done under the Engineering Department and a complete list of such construction, together with the location of each separate job, will be found in the following tabulation:

Street and location	Lin. ft. sidewalk	Lin. ft. curbing	Lin. ft. gutters
Chase St.—Both sides—Colchester Ave. to Grove St.	811	2,013	
Clymer St.—Both sides—Shelburne St. to end	1,333	1,352	
S. Willard St.—West side—Front of 429-439	159		
N. Willard St.—West side—Charles to Pomeroy	221		
Mansfield Ave.—West side—Loomis to Colchester Ave.	864		
Pine St.—East side—Main St. to Maple	572		
Bright St.—West side—Archibald to First	531		
Loomis St.—North side—Willard to Weston	272		
Weston St.—West side—Loomis to Henry	214		
Cherry St.—South side—S. Champlain to Battery	336		
S. Union St.—East side—Bay View to Howard	460		

Street and location	Lin. ft. sidewalk	Lin. ft. curbing	Lin. ft. gutters
Bay View St.—South side—Union St. easterly	150		
Summit St.—Both sides—Maple St. to Cliff	2,926	959	1,305
N. Bend St.—Both sides—Spring to Oak	1,699	1,716	1,716
Maple St.—Both sides—Union to Willard	903		
Maple St.—South side—St. Paul to Pine	304

Private work—Various locations	1,622		
Totals	23,829	6,966	3,031

MAPS AND RECORDS

All maps and records, including all construction work as well as house maps and sewer maps, have been brought up to date and made a matter of record and blueprints have been made of the same, the original being filed in the new plan file which is kept in the fireproof vault while the blueprint is kept in our vertical plan file for ready reference in the office. This makes a double set of plans which insures the City of permanent record in case of fire instead of keeping the plans all on file in the office of the City Engineer as here-

tofore had been done, with the possibility of the total loss of plans and records in case of fire.

The construction map of the City which is herewith attached as a part of this report will show in color scheme the additions and locations of the different types of construction as well as the addition of new streets which have been accepted by the City during the year.

SEWERS

Over 3,000 feet of sewers have been constructed during the past year and a complete list of the sewers in the City, including this year's construction, is shown in the following tabulation:

TOTAL LENGTH OF SEWERS

Size	Cement feet	Brick feet	Vitrified pipe feet	Monolithic concrete feet	Stone feet	Total feet
6-inch			1,783			1,783
8-inch	365		27,197			27,562
10-inch			25,769			25,769
12-inch	9,273		71,275			80,548
15-inch		976	17,643			18,619
18-inch	2,713	1,788	12,599			17,100
20-inch			2,273			2,273
24-inch	360	1,748	3,692			5,800
30-inch		2,621				2,621
36-inch		5,025		55		5,080
36x48-inch					1,600	1,600
48-inch		1,048				1,048
60-inch		125				125
72-inch		600				600
Totals	12,711	13,931	162,231	55	1,600	190,528

The total length of sewers is equal to 36.084 miles.

MISCELLANEOUS WORK

A certain amount of miscellaneous work in connection with the construction or eliminations of certain types of crossings, sidewalks,

curbs and gutters has been done from year to year and a list of the same brought up to date, will be found in the following tabulation based upon the information in the previous reports on such work given by the City Engineer:

CHARACTER OF WORK	No.	Total in miles
Length of walk flagged and curbed with stone		2.996
Length of tar-concrete walk curbed with stone		15.920
Length of earth or gravel walk curbed with stone		5.788
Length of tar-concrete walk without curb		1.418
Length of cement walk without curb		2.037
Length of cement walk and curb		16.788
Length of cement walk		37.561
Length of cement curb		15.749
Length of cement gutter		8.094
Number of cement crossings	25	
Number of brick crossings	19	
Number of tar-concrete crossings	76	
Number of stone crossings	140	
Number of sewer connections since 1887	2,751	

Bridge Ordinance.—In accordance with an ordinance relating to the inspection of culverts and bridges I have inspected all bridges and culverts as usual and reports on same have been submitted to the Board of Aldermen and the Board of Street Commissioners.

Departmental Work.—All requests for work from the several city departments such as surveys, maps, measurements, lines and grades or any other work of an engineering character have been properly given and any expense connected therewith for any materials and labor, not including the services of the City Engineer, has been billed to the several departments.

House Numbering.—The house number system has been kept up to date and the plan now in operation in conjunction with the Building Inspector allows us a good check on seeing that all new houses or additions to old houses receive the proper numbers. During the year we have issued 64 permits for new numbers and notices have been sent to the respective owners.

BOND ISSUE CONSTRUCTION

This year finishes our five-year period of Bond Issue street construction, which was $50,000 per year for a term of five years or a total of $250,000.

The work this year was carried on as a continuation of the system started three years ago and the full program as previously estimated for 1926 which was S. Willard Street from College Street to Pearl Street, St. Paul Street from Main Street to Bank Street, Church Street from Main Street to King Street and Colchester Avenue from Prospect Street to East Avenue, was completed on November 26, including S. Willard Street from Main Street to Spruce Street, which was left over from the 1925 program.

Stone-filled sheet asphalt pavement under construction on St. Paul Street in front of the City Hall Park, one-half of the pavement being constructed at a time. Note the binder course on the left and the finished pavement on the right, with the longitudinal joint at the crown of the street. This pavement is 55 feet in width.

There was some variations as to the thickness of the different courses of pavement, therefore a detail of the construction work on each separate job will be found under the following subheadings:

St. Paul Street from Main Street to Bank Street.—This was the first street constructed in 1926. The old surface was used as a base and a 1½-inch binder with 1½-inch wearing course of stone-filled sheet asphalt was constructed. This street is 55 feet wide between curbs on the block between Main Street and College Street and 40 feet wide between curbs on the block between College Street and Bank Street. The total area on this job was 4,307 square yards. In constructing this job 335.5 tons of binder mixture and 317.5 tons of wearing course mixture were used. The total cost of the job was $7,956.69. This job was completed on July 10.

Church Street from Main Street to King Street.—This was the second job of the season. The old water-bound macadam surface was used as a base and new concrete curbing was constructed on the easterly side of the street, after which a 1½-inch binder course and a 1½-inch top course of stone-filled sheet asphalt was constructed, using 136.5 tons of binder material and 90 tons of wearing surface material. The total area of this job was 1,584 square yards. The total cost was $2,142.28. The work was completed July 20.

S. Willard Street from Main Street to Spruce Street.—This was the third job of the season and was divided in two sections, the first section constructed being the block between Maple Street and Spruce Street. On account of the excessive crown and the clay sub-soil condition it was necessary to do a considerable amount of excavation. The old material which was of any use was salvaged and used for resurfacing S. Prospect Street from Cliff Street southerly to Dr. Twitchell's residence and North Street from N. Prospect Street to Mansfield Avenue. All other excavated material was used for grading the proposed sidewalk on Summit and S. Prospect Streets. After all excavation was completed a 6-inch concrete base was constructed on this entire area, which totaled 4,624 square yards, the concrete mix being 1-2½-5. The total cost of this concrete base was $5,051.10. On top of this concrete base was constructed a 1-inch binder course and a 1-inch wearing surface of standard sheet asphalt mixture. The second section of this construction job was from Maple Street to Main Street. We used the old gravel and crushed stone surface for our

base after scarifying and reshaping the same and a considerable amount of crushed stone was used for bringing the crown to the proper contour, especially in the gutters. The curb depth on this block had to be reduced on the westerly side and increased somewhat on the easterly side in order to obtain a pavement which would not have an excessive crown. A 1½-inch binder course and a 1½-inch wearing surface of stone-filled sheet asphalt was constructed on this section of the job. A total of 473 tons of binder and 426 tons of wearing course materials were used in constructing both sections of this pavement. The total area of this complete job was 7,836 square yards. The total cost of the entire job, including concrete base, was $19,828.59. This job was completed on August 18, 1926.

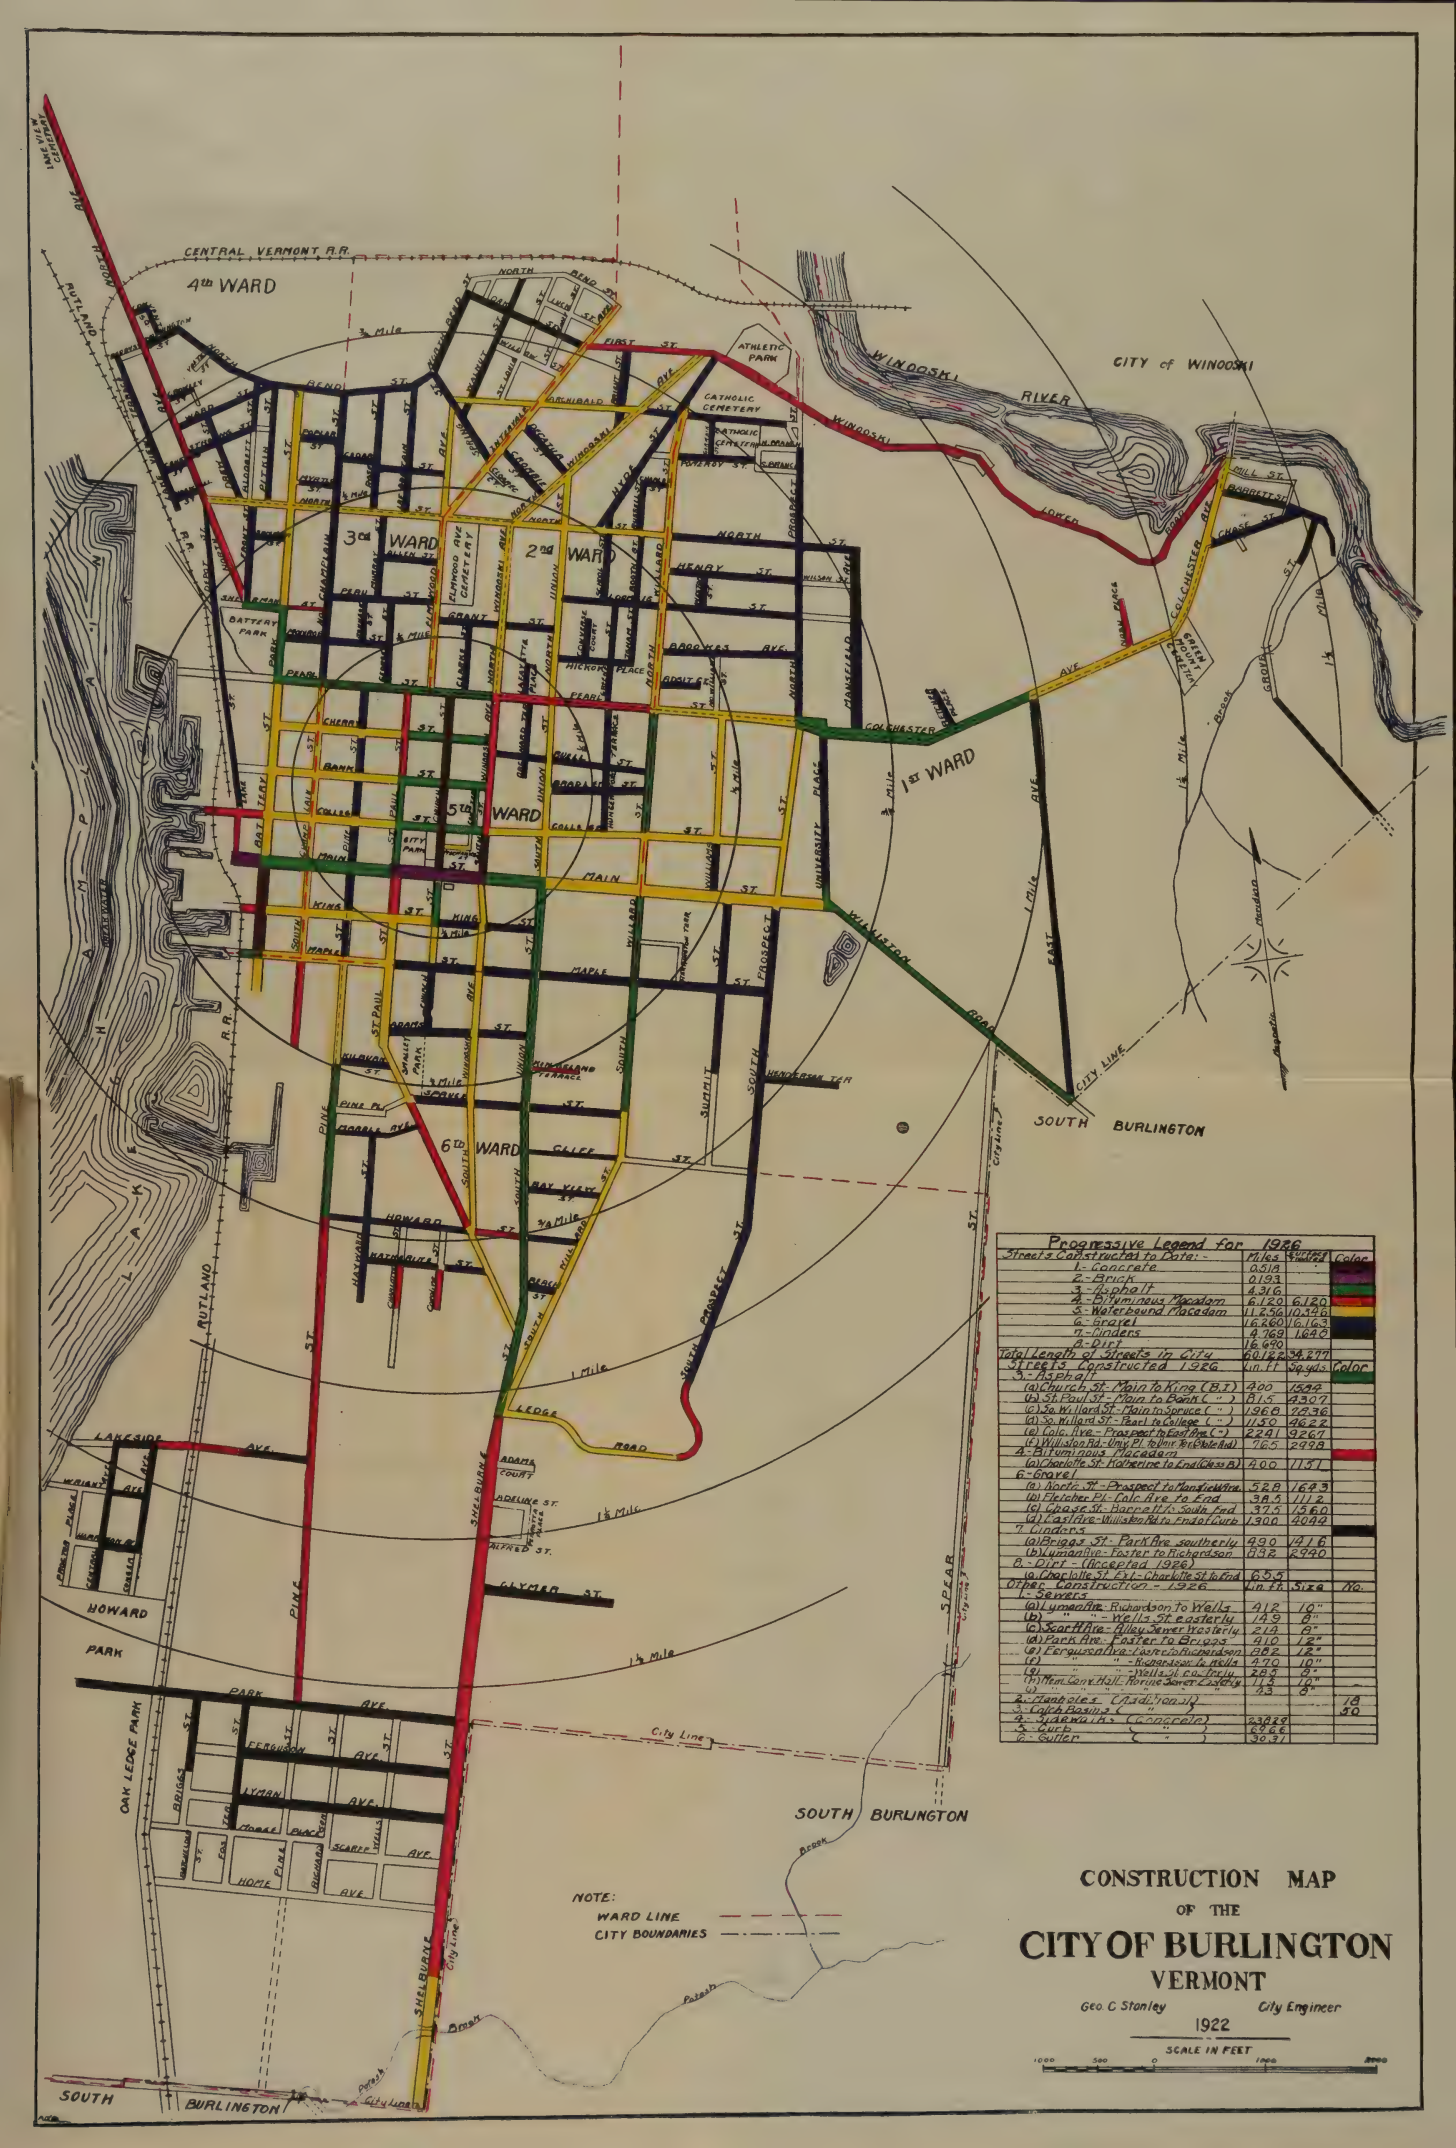

S. Willard Street from College Street to Pearl Street.—This was the fourth job of the season and we were able to use the old macadam for a base by adding a thin surface of crushed stone. The total area of this job was 4,622 square yards. A 1½-inch binder course with a 1½-inch wearing course was constructed in a similar manner to the previous jobs, using 375 tons of binder and 354 tons of wearing surface mixtures, at a total cost of $7,736.93. The construction on this job was completed on September 20.

Colchester Avenue from Prospect Street to East Avenue.—This was the fifth or last job under the Bond Issue program. We found that we had a large amount of surplus material to be hauled from this job and the salvaged material was used to resurface Fletcher Place for its entire length, also East Avenue from Williston Road northerly, approximately 1,300 feet. The plans for the cross section of this street were changed so as to eliminate heavy excavation, also to utilize the old pavement as a base course and to draw all surface drainage in one direction. This pavement was constructed 26 feet wide, not including the 6-inch curbing placed parallel with the trolley track to protect the breaking down of the shoulder of the pavement. The electric car track was relocated and placed in the center of the street from Prospect Street to a point between University Place and Mansfield Avenue, where it diverted to the south to meet the old location on the south side of the pavement outside of the traveled area. The relocation of this track was done by the Burlington Traction Company, which included the construction of a reinforced concrete slab foundation under the ties directly beneath each rail. The Street

base after scarifying and reshaping the same and a considerable amount of crushed stone was used for bringing the crown to the proper contour, especially in the gutters. The curb depth on this block had to be reduced on the westerly side and increased somewhat on the easterly side in order to obtain a pavement which would not have an excessive crown. A 1½-inch binder course and a 1½-inch wearing surface of stone-filled sheet asphalt was constructed on this section of the job. A total of 473 tons of binder and 426 tons of wearing course materials were used in constructing both sections of this pavement. The total area of this complete job was 7,836 square yards. The total cost of the entire job, including concrete base, was $19,828.59. This job was completed on August 18, 1926.

S. Willard Street from College Street to Pearl Street.—This was the fourth job of the season and we were able to use the old macadam for a base by adding a thin surface of crushed stone. The total area of this job was 4,622 square yards. A 1½-inch binder course with a 1½-inch wearing course was constructed in a similar manner to the previous jobs, using 375 tons of binder and 354 tons of wearing surface mixtures, at a total cost of $7,736.93. The construction on this job was completed on September 20.

Colchester Avenue from Prospect Street to East Avenue.—This was the fifth or last job under the Bond Issue program. We found that we had a large amount of surplus material to be hauled from this job and the salvaged material was used to resurface Fletcher Place for its entire length, also East Avenue from Williston Road northerly, approximately 1,300 feet. The plans for the cross section of this street were changed so as to eliminate heavy excavation, also to utilize the old pavement as a base course and to draw all surface drainage in one direction. This pavement was constructed 26 feet wide, not including the 6-inch curbing placed parallel with the trolley track to protect the breaking down of the shoulder of the pavement. The electric car track was relocated and placed in the center of the street from Prospect Street to a point between University Place and Mansfield Avenue, where it diverted to the south to meet the old location on the south side of the pavement outside of the traveled area. The relocation of this track was done by the Burlington Traction Company, which included the construction of a reinforced concrete slab foundation under the ties directly beneath each rail. The Street

CONSTRUCTION MAP
OF THE
CITY OF BURLINGTON
VERMONT

Geo. C Stanley City Engineer

1922

SCALE IN FEET

Department constructed a concrete pavement over the entire area enveloping the ties and extending to within 3 inches of the surface of the street and two feet outside of the rails with a concrete shoulder extending to the surface on the inside of the rails. The intersection of University Place as well as Fletcher Place and the entrance to the Mary Fletcher Hospital were all developed, including concrete curbs and new pavement. The total area of pavement constructed on this job was 9,267 square yards. The pavement consisted of 2-inch binder course and 1 inch of top course or stone-filled sheet asphalt wearing course. A total of 845 tons of binder and 500 tons of wearing course mixture were used in the construction of this job. The total cost of this job complete was $21,648.88. The work was completed on November 26.

From the above figures it will be noted the total area of new asphaltic pavement construction under the Bond Issue program for this year was 27,616 square yards, which cost a total of $59,313.37. This gives an average unit cost of $2.15 per square yard. To this unit cost should be added 11 cents per square yard to cover depreciation and interest charges on our plant investment. A summary showing in detail the separate items of construction and cost of each job as constructed follows herewith:

SUMMARY SHEET—ASPHALT CONSTRUCTION 1926

BOND ISSUE CONSTRUCTION

Street	Square Yards	Cost of Base Preparation	Cost of Asphalt Paving	Cost of Maintenance and Repairs	Light and Power, Water and Telephone	Actual Cost of Job	Unit Cost per square yard for Base	Unit Cost per sq. yd. for Asphalt Pav. (top and binder)	Unit Cost per sq. yd. for Maintenance and Repairs	Unit Cost per sq. yd. for Pavem't complete (base, top and binder)
Church St.:

SPECIAL CONSTRUCTION

Williston Road:										
Prospect-East Ave.:	2,998.4	$ 3,721.38	$ 3,481.54	$ 254.45	$ 53.97	$ 7,511.34	$1.24128	$1.17929	$.08487	$2.50544

Note: To the above unit costs should be added $0.11089 per square yard to cover depreciation and interest on the plant investment.

Asphalt Plant.—A few alterations and additions were made to our plant this year which has made the plant more efficient in operation as well as easier to handle. We have eliminated the old steam-driven

MUNICIPAL ASPHALT PLANT

More than 72,000 square yards of asphalt pavements have been constructed during the last three years, all mixtures for which have been proportioned, mixed and tested at this plant. Cold patch mixtures for maintenance use in our patrol system have been mixed at this plant for the last two years. The Graham trucks are used for transporting the street mixtures from the plant to the street job.

units and have installed one large 40 h. p. motor with speed-reduction gears, thus eliminating the necessity of running two boilers. This gives us an auxiliary boiler for use in heating asphalt tank cars and it can also be used as an extra boiler in case any trouble might occur with the one ordinarily used. Another improvement which was made to the plant was the discarding of the old dial weighing system and

the installation of a new weighing system, where the materials are all weighed in a materials bin which rests on a set of three-beam platform scales. In order to install this system it became necessary to raise our materials bins and lengthen our elevator shaft. A new bank of transformers and a complete rewiring system both for lights and power was installed. The larger transformers were necessary because of the installation of our new motor.

A new drum for drying the materials was installed to replace the old one which was too light and quite badly burned out. A small metal room was constructed as a motor house for the new motor and speed-reduction unit which enables us to keep our motors as free from dust as possible.

I feel that our plant in its present condition is better equipped and capable of more efficient work after its three years of service than it was at the time it was purchased.

CONCLUSION

In conclusion I would say that the results obtained from municipal ownership of our plant and equipment for doing our Bond Issue pavement work is most satisfactory. We have been able to complete a much larger program than we would have been able to under the contract system because as the above figures will show we have been able to do the work for a smaller unit cost than the work which was done under contract. In addition to this we have had the advantage of being able to arrange our schedule of work so as not to interfere with other construction and to suit our convenience as to the time and methods of construction. We now have a plant with all necessary additional tools and equipment, together with an organization capable of handling any amount of work which we might be called upon to construct in a city of this size and I hope that some means will present itself of providing funds to continue a certain amount of pavement construction each year as we have now been able to get a good start on our permanent streets, and this system should be continued each year until we have one of the best paved cities in the New England States.

Many cities throughout the United States are pursuing the same course that we are here in Burlington and each year brings forth some new ideas in pavement construction. Many of these ideas are given

to the public through the medium of the Asphalt Association at the annual conventions. It has been my pleasure to attend two of these conventions, one in Detroit, Mich., and the other in Washington, D. C. I have been able to gather many helpful ideas and suggestions through the personal contact with men handling similar problems who have been present at these conventions.

One of the most interesting discussions at the Washington Convention was along the lines of conservation of old pavements. In other words, it was recommended that whenever possible to use the old pavements as a base upon which we might construct a new pavement or wearing surface that it was in the interests of good judgment and economy to do so. This is just what we have been endeavoring to do each year during the construction of our asphalt pavements and I believe that the results as shown by this report as well as the reports of previous years will speak for themselves as to the advisability of handling our pavement construction with our own equipment and organization.

I have endeavored to carry out the Bond Issue street construction work to the best of my ability and it is with pleasure that I submit this report for the last year of the Bond Issue street improvement program.

Respectfully submitted,

GEO. C. STANLEY,

City Engineer.

REPORT OF THE

FIRE COMMISSIONERS

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—In compliance with the City Ordinance we submit the Fire Commissioners' report for the year ending December 31, 1926.

The appropriation for maintenance was	$62,500 00
Credit by cash	40 00
Total receipts	$62,540 00
Pay roll	55,616 27
Monthly statements	9,383 34
Total expenditures	$64,999 61
Making an overdraft of	$ 2,459 61

For an itemized account and the working of the department see Chief Engineer Stockwell's report.

With appreciation for the support given us this report is submitted.

FRANK E. MORGAN,
G. D. McBRIDE,
J. H. MIDDLEBROOK,
Board of Fire Commissioners.

In Memoriam

FRANK E. PERKINS

Deceased October Twenty-second

Nineteen Hundred Twenty-six

Chairman Board of Fire Commissioners

From April 25, 1912, to October, 1926

SIXTY-FIRST ANNUAL REPORT

OF THE

CHIEF ENGINEER FIRE DEPARTMENT

To the Honorable Board of Fire Commissioners of the City of Burlington:

GENTLEMEN:—According to the City Ordinance I have the honor to submit to you the sixty-first annual report of the Fire Department of the City of Burlington for the year ending December 31, 1926.

MANUAL FORCE

The manual force consists of thirty-five permanent men, one chief engineer, one assistant engineer, three captains, six chauffeurs and twenty-five hose and ladder men, two substitute men for vacations and sickness in the department.

HOUSES

The City owns four fire houses, Fire Headquarters Station No. 1, 135 Church Street, with offices of chief engineer, assistant chief engineer, superintendent of fire alarm system and inspector of wires.

Station No. 2, 120 N. Champlain Street.

Station No. 3, 16 Mansfield Avenue.

Station No. 4, S. Union Street.

APPARATUS

The department has in service for extinguishing fires:

Station No. 1. Two Segrave 750-gallon pumps, 130 horse power, with 80-gallon tank for booster pump. Twelve hundred feet (each) of two and one-half inch regulation double jacket rubber-lined hose, one life net, one life belt, one LaFrance smoke protector and all necessary tools and equipment.

Station No. 2. One American LaFrance auto combination, Type 5, No. 10, with one 40-gallon chemical tank and two hundred and fifty

feet of chemical hose, eight hundred feet of two and one-half inch regulation double jacket rubber-lined hose, one Draeger smoke protector and all necessary tools and equipment.

Station No. 3. Has one Selden combination auto truck with one 40-gallon chemical tank, two hundred feet of chemical hose, two thousand feet of two and one-half inch regulation double jacket rubber-lined hose, one Hart turrit pipe mounted on body and all necessary tools and equipment.

One Segrave tractor-drawn 85-foot aerial hook and ladder truck, the main stick being 45 feet long, with an extension of 40 feet, so when extended it reaches a height of 85 feet. On main stick is mounted a Morse ladder pipe and fifty feet of three-inch double jacket rubber-lined regulation hose with two-way "y," meaning that ladder can be used as a water tower. There is also three hundred and sixty feet of ladders, including extension wall and roof, pike poles, plaster hooks, door opener and large pull-down hook with chain and rope, all necessary tools and equipment.

One chief's car which is housed at old Fire Station No. 5, S. Union Street, with one Draeger pulmotor.

One Ford one-ton truck at Fire Station No. 1.

The department has in reserve one two-horse drawn Segrave city service hook and ladder truck with three hundred and twenty feet of ladders, sixty-five feet the longest, one two-horse drawn combination wagon with two 30-gallon chemical tanks. Two two-horse drawn sleighs, one fourth size steam fire engine, eighteen two and one-half gallon soda and acid hand extinguishers, one two and one-half gallon Childs' Fomite extinguishers.

FIRE ALARM SYSTEM

The fire alarm system is of the Gamewell make and consists of one six-circuit repeater, one six-circuit switchboard, one hundred and fifty-six cells, five indicators, six tappers, thirty-five miles of aerial wire and one mile of underground lead cable with seventy-seven street boxes.

HOSE

The department has on hand ten thousand feet of two and one-half inch double jacket rubber-lined regulation hose; of this, five hundred and fifty feet is in poor condition. Nine hundred feet of

three-quarter inch chemical hose; of this, two hundred feet is in poor condition. Fifty feet of three-inch double jacket rubber-lined regulation hose in good condition.

ALARMS

During the year your department has responded to two hundred and forty-five alarms, an increase of thirty-seven over the past year and the largest number in the history of the department. The department responded to twenty-one requests for assistance from other towns and cities, seven times to South Burlington, six times to Colchester, two times to Winooski, two times to Williston, once to Shelburne, two times to Charlotte and one time to St. George.

COST OF MAINTAINING THE DEPARTMENT

The cost of maintaining the department the past year was $64,999.61. Regular men's pay roll, $55,616.27; monthly statements, $9,383.34. The appropriation was $62,500, credit by cash of $40, total $62,540, making an overdraft of $2,459.61.

REMARKS

The insurance paid by the insurance agents for fires in your City the past year was $62,361.31. Of this amount there was paid $1,473.40 in losses that the department knew nothing of. While the losses are larger this year than last, the department did remarkable work not only in saving property, but in saving life such as at the Green Bros.' fire the night of February 18, taking down sixteen people on ladders and directing others across the icy roofs to safety and still confining the fire to a small area. The Spear Bros.' fire the night of February 19, the farm barn of U. A. Woodbury at Appletree Point May 7, the Baldwin Refrigerator Co. fire the night of May 16 and the Standard Steam Laundry fire May 23. These are the largest losses for the year.

One mile of wire has been strung and the fire alarm has been extended from Park Avenue to Home Avenue on Shelburne Street. Two new fire alarm boxes were purchased and installed, 71 at Home Avenue and Shelburne Street and 72 at Clymer and Shelburne Streets.

STATION No. 1, LOCATED 135 CHURCH ST.

FIRE HEADQUARTERS

C. D. Stockwell, Chief, 469 S. Union St., appointed April 25, 1904

In closing the sixty-first annual report I desire to extend to the Board of Fire Commissioners, the Board of Finance, the Board of Aldermen, his Honor, Mayor C. H. Beecher, officers and members of the Fire Department, also to the Police Department generally, an expression of appreciation of the efficient service rendered at all times.

Respectfully submitted,

CARL D. STOCKWELL,
Chief Fire Department.

CARL D. STOCKWELL, Chief.

REPORT OF THE

FIRE WARDEN

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—I have the honor herewith to submit the annual report of the Fire Warden for the year ending December 31, 1926, being a complete report of inspection made of property and surroundings.

In the mercantile district inspections have been made once each week; the outer districts have been thoroughly inspected. Complaints promptly attended to and accurate record kept of some. There have been three thousand inspections made during the year.

In conclusion I extend my thanks to his Honor, Mayor Clarence H. Beecher, the Board of Aldermen and deputies for the favorable response to such requests as I have made, and to all others who have in any way assisted me in my duties in this office.

Respectfully submitted,

CARL D. STOCKWELL,

Fire Warden.

REPORT OF THE

WIRE INSPECTOR

Burlington, Vt., January 1, 1927.

To the Honorable Board of Aldermen:

GENTLEMEN:—I herewith submit to you my annual report as Wire Inspector for the year ending December 31, 1926, as follows:

Number wiring permits granted 303
Number service and meter permits 117
Number inspections made 555

Respectfully submitted,

EARL K. PRESSEY,
Wire Inspector.

REPORT OF THE

BUILDING INSPECTOR

To the Honorable City Council:

I beg to submit herewith the report of the Building Inspector for the period April 1 to December 31, 1926. A considerable proportion of the projects for which permits were issued have been completed and the balance are under way and in all probability will be completed in the early part of 1927. Several buildings have been inspected as to safety and the necessary repairs have been made to put these buildings in safe condition. It was deemed best to radically change the office records so as to be able to place before the public from month to month in an intelligent manner the progress of the City in new and additional construction. Monthly reports have been made to the Board of Aldermen in accordance with the vote of that body. Below is given a summary of the permits issued for the period analyzed in conformity to the new system as above mentioned.

ANALYSIS PERMITS ISSUED APRIL 1 TO DECEMBER 31, 1926

Description	No.	Value
Houses—Business blocks	55	$457,000
Garages	85	56,160
Additions affecting value of property	78	46,925
Camps	5	1,400
Store houses	13	62,150
Bill boards	1	800
Miscellaneous not affecting value of property	75	
Total	312	$624,435
Public buildings	3	525,800
Total	315	$1,150,235

Respectfully submitted,

R. L. SOULE,

Building Inspector.

January 15, 1927.

REST ROOM

To the Honorable City Council of Burlington:

GENTLEMEN:—The year 1926 has been one of continued success for the Rest Room for women and children. An average of over one hundred persons per day have used some part of the Rest Room quarters. The proprietor of the building where we are now located has put up a stair rail which has added much to the safety of the elderly women and is greatly appreciated.

The care of the Rest Room has been again in the hands of the efficient matron, Mrs. Jennie Delorme.

The officers and patrons of the Rest Room are anticipating and anxiously waiting moving into their new quarters in the new City Hall some time during the year 1927.

Respectfully submitted,

MRS. E. D. WORTHEN,
President Rest Room Association.

Burlington, Vt., January 24, 1927.

Annual City Election

WARNING

THE LEGAL VOTERS OF THE CITY OF BURLINGTON, VERMONT, ARE HEREBY NOTIFIED AND WARNED TO MEET IN ANNUAL CITY MEETING ON

TUESDAY, THE FIRST DAY OF MARCH, A. D. 1927

at 6 o'clock in the forenoon, in their respective Wards, at the several voting places hereinafter named, for the purpose of electing a Mayor for the term of two years and other officers required by law as follows:

In WARD ONE—One Alderman, one School Commissioner and Ward Officers, and in

WARD TWO—One Alderman, one School Commissioner and Ward Officers, and in

WARD THREE—One Alderman, one School Commissioner and Ward Officers, and in

WARD FOUR—One Alderman, one School Commissioner for unexpired term and one School Commissioner for regular term and Ward Officers, and in

WARD FIVE—One Alderman and Ward Officers, and in

WARD SIX—One Alderman and Ward Officers.

All Ward Officers are to be elected for the term of one year, all Aldermen for the term of two years, one School Commissioner in each of Wards One and Three for the unexpired term from April 1, 1927, to July 1, 1929, one School Commissioner in Ward Two for the term of three years beginning July 1, 1927, and in Ward Four one School Commissioner for the unexpired term from April 1, 1927, to July 1, 1927, and one School Commissioner for the term of three years beginning July 1, 1927.

The following are designated as Election Precincts, viz.:

In WARD ONE—At Fire Station No. 3, Mansfield Ave.

In WARD TWO—At 138 N. Winooski Ave.

In WARD THREE—At Fire Station No. 2, 120 N. Champlain St.

In WARD FOUR—North Avenue Garage, 141 North Ave.

In WARD FIVE—At State Armory, 124 Cherry St.

In WARD SIX—At Fire Station No. 5, 469 S. Union St.

The Polls open at 6 o'clock in the forenoon and close at 3 o'clock in the afternoon.

C. H. BEECHER, Mayor.

Burlington, Vt., February 10, 1927.
